CORRIGENDUM

W. J. Cody & Henry C. Thacher, Jr., "Rational Chebyshev approximations for Fermi-Dirac integrals of orders $-\frac{1}{2}, \frac{1}{2}$ and $\frac{3}{2}$," *Math. Comp.*, v. 21, 1967, pp. 30-40.

On p. 35 in the heading of Table IIB read

$$\ldots p_s e^{sx} \ldots$$

On p. 35 in Table IIC the coefficient q_0 for $n = 4$ should read

$$1.00000\ 00000\ 00\ (00)$$

On p. 36 in Table IIIA the coefficient p_0 for $n = 2$ is

positive

On p. 38 in Table IVB the exponent in p_0 for $n = 2$ and $n = 3$ should be

$$(-01).$$

NOTES

New Journals

The *Siberian Mathematical Journal,* one of the major Soviet Journals reporting advanced mathematical theory and research, is now available for the first time in complete cover-to-cover English translation from Consultants Bureau. The bi-monthly journal is published originally by the Siberian Branch of the Soviet Academy of Sciences in Akademgorod ("Science City"), the new educational and research center near Novosibirsk, and is under the editorship of an eminent group of mathematicians headed by Academician A. I. Mal'tsev of the Institute of Mathematics. Associate editors are A. V. Bitsadze and Yu. G. Reshetnyak.

Richard Courant of the Courant Institute of Mathematical Sciences, New York University, is Advisory Translations Editor.

The annual subscription is $150.

Subscription orders and inquiries should be sent to Consultants Bureau, 227 West 17th Street, New York, New York 10011.

The new *Journal of Engineering Mathematics,* commencing publication with the January 1967 issue, hopes to provide a medium of rapid communication of the increasing flow of research in the field of application of mathematics to engineering science.

The aim of the journal is to promote the application of mathematics to engineering problems and to stress the intrinsic unity of the fundamental problems of different branches of engineering varying from basic principles of physics and mechanics to management and computer science. Manuscripts of a purely mathemat-

ical character are only considered for publication if their bearing on engineering sub-jects is apparent, on the other hand contributions on engineering subjects are only acceptable if the mathematical approach to the problem considered is essential.

Editor-in-Chief: R. Timman. Board of editors: A. J. W. Duijvestein, P. Eijkhoff, J. W. Sieben, J. A. Sparenberg, E. van Spiegel, G. W. Veltkamp, A. I. van de Vooren, J. V. Wehausen, L. van Wijngaarden, P. J. Zandbergen. Editorial secretary: H. W. Hoogstraten, Technical University, Delft.

It is issued quarterly (January, April, July and October) with a content of about 80 pages per issue.

Annual subscription rates for libraries, institutes, firms, government organiza-tions: $16.50 per volume, postage included.

Special rates for individuals are available on application.

Available back volumes $8.00. Single copies of back volumes $2.50.

Subscriptions and orders should be addressed either to your bookseller or di-rectly to:

P. Noordhoff Ltd.,
Scientific Publications Department,
P.O. Box 39, Groningen, The Netherlands.
