On p. 953 under (4) *Acceptance-rejection method*, the senses of both inequalities should be reversed, so that they will correctly read

$$e^{-(x-1)^2/2} \geqq u_2 \quad \text{and} \quad (x-1)^2 \leqq -2(\ln u_2)\,.$$

EDITORIAL NOTE: This correction has been made in the fifth and subsequent printings.

On p. 797, in Table 22.7 the entry in row C_{10} and column x^8 should read -10, instead of -20.

On p. 799, in Table 22.10, the entry in row L_8 and column x^9 should read 3265920, instead of 3269520.

EDITORIAL NOTE: The first of these errata has been corrected in the sixth and subsequent printings.

443.—M. HALL & J. K. SENIOR, *The Groups of Order 2^n ($n \leqq 6$)*, Macmillan, New York, 1964.

In the course of computing character tables for the groups of order 2^n ($n \leqq 6$) the following errors were noted:
