Mathematics of Computation

Volume 25, Number 115
July, 1971

CODEN: MCMPAF

Published by the American Mathematical Society

PROVIDENCE, RHODE ISLAND

Editorial Committee

EUGENE ISAACSON, Chairman, New York University, Courant Institute of Mathematical Sciences, 251 Mercer Street, New York, New York 10012
Assistant to the Chairman: CHARLOTTE W. JOHN

JAMES H. BRAMBLE, Department of Mathematics, Cornell University, Ithaca, New York 14850

JAMES W. DANIEL, Department of Mathematics, University of Texas at Austin, Austin, Texas 78712

WALTER GAUTSCHI, Computer Sciences Department, Purdue University, Lafayette, Indiana 47907

DONALD GOLDFARB, Department of Computer Sciences, School of Engineering, The City College of the City University of New York, 139th Street & Convent Avenue, New York, New York 10031

ALSTON S. HOUSEHOLDER, Department of Mathematics, Ayres Hall, The University of Tennessee, Knoxville, Tennessee 37916

HEINZ-OTTO KREISS, Computer Science Department, University of Uppsala, Uppsala, Sturegaten 4, Sweden

YUDELL L. LUKE, Department of Mathematics, University of Missouri at Kansas City, Kansas City, Missouri 64110

JAMES N. LYNESS, Argonne National Laboratory, 9700 South Cass Avenue, Argonne, Illinois 60439

BERESFORD PARLETT, Department of Computer Science, University of California, Berkeley, California 94720

PHILIP RABINOWITZ, Department of Applied Mathematics, The Weizmann Institute of Science, Rehovot, Israel

DANIEL SHANKS, Naval Ship Research and Development Center, Washington, D.C. 20034

HANS J. STETTER, Institut für Numerische Mathematik, Technische Hochschule Wien, A-1040 Wien, Karlsplatz 13, Austria

JOHN W. WRENCH, JR., Naval Ship Research and Development Center, Washington, D.C. 20034

Information for Subscribers

The journal is published quarterly in one volume per year, with issues numbered serially since Volume 1, Number 1. The subscription price is $20.00. All back volumes are available. For Volumes 1–19 (1943–1965), prices are $20.00 per volume, subsequent volumes are $24.00.

Unpublished Mathematical Tables

The editorial office of the journal maintains a repository of Unpublished Mathematical Tables (UMT). When a table is deposited in the UMT repository a brief summary of its contents is published in the section *Reviews and Descriptions of Tables and Books*. Upon request, the chairman of the editorial committee will supply copies of any table for a nominal cost per page.

Subscriptions, address changes, business communications and payments should be sent to:

Mathematics of Computation

TABLE OF CONTENTS

JULY 1971

Stability of Bounded Solutions of Linear Functional Equations
JOEL N. FRANKLIN 413

Numerical Solution of a Parabolic Free Boundary Problem Arising in Statistical Decision Theory ..... GARY G. SACKETT 425

The Method of Christopherson for Solving Free Boundary Problems for Infinite Journal Bearings by Means of Finite Differences
COLIN W. CRYER 435

Comparing Error Estimators for Runge-Kutta Methods
L. F. SHAMPINE & H. A. WATTS 445

PECE Algorithms for the Solution of Stiff Systems of Ordinary Differential Equations ..... R. W. KLOPFENSTEIN & C. B. DAVIS 457

The Linear Two-Point Boundary-Value Problem on an Infinite Interval
T. N. ROBERTSON 475

The Calculation of Fourier Coefficients by the Möbius Inversion of the Poisson Summation Formula. Part III. Functions Having Algebraic Singularities ..... J. N. LYNESS 483

Optimal Quadrature Formulas Using Generalized Inverses. Part I: General Theory and Minimum Variance Formulas ..... C. S. DURIS 495

Error Bounds for Compound Quadrature of Weakly Singular Integrals
ALAN FELDSTEIN & RICHARD K. MILLER 505

On Ignoring the Singularity in Numerical Quadrature ..... R. K. MILLER 521

An Elliptic Integral Identity ..... M. L. GLASSER 533

A Closed Form Evaluation of the Elliptic Integral
M. L. GLASSER & V. E. WOOD 535

Chebyshev Approximations for the Riemann Zeta Function
W. J. CODY, K. E. HILLSTROM & HENRY C. THACHER, JR. 537

A Generalized Interpolation Algorithm ..... A. C. R. NEWBERY 549

Some Relations Between the Values of a Function and its First Derivative at n Abscissa Points ..... ROBERT E. HUDDLESTON 553

On the Convergence of Broyden's Method for Nonlinear Systems of Equations
J. E. DENNIS, JR. 559

On Descent from Local Minima ..... A. A. GOLDSTEIN & J. F. PRICE 569

Exponential Chebyshev Approximation on Finite Subsets of [0, 1]
BERNARD H. ROSMAN 575

On Jacobi and Jacobi-Like Algorithms for a Parallel Computer
AHMED H. SAMEH 579

A Stable, Rational *QR* Algorithm for the Computation of the Eigenvalues of an Hermitian, Tridiagonal Matrix ..... CHRISTIAN H. REINSCH 591

The Triangular Decomposition of Hankel Matrices .... JAMES L. PHILLIPS 599

Homomorphisms of Knot Groups on Finite Groups ..... ROBERT RILEY 603

On a Diophantine Equation Related to Perfect Codes ..... RONALD ALTER 621

On the Feit-Thompson Conjecture ..... N. M. STEPHENS 625

REVIEWS AND DESCRIPTIONS OF TABLES AND BOOKS 627
FETTIS & CASLIN **30,** FIKE **35,** FORBES & LAL **31,** FOSTER **36,** GAMKRELIDZE **29,** HAMMARLING **27,** HAUPTMAN, VEGH & FISHER **32,** HOUSEHOLDER **28,** KINSEY **26,** KUMIN **34,** RILEY **33.**

TABLE ERRATA 635
ERDÉLYI, MAGNUS, OBERHETTINGER & TRICOMI **481.**

CORRIGENDUM 637
PEXTON

Information for Contributors

Manuscripts should be typewritten double-spaced in the format used by the journal. For journal abbreviations, see the latest *Mathematical Reviews* volume index. An author should submit the original and one copy of the manuscript and retain one copy. The author may suggest an appropriate editor for his paper. It is recommended that the author acquaint himself with the pertinent material contained in "Information for Contributors to Mathematics of Computation" and "Manual for Authors," both of which are available upon request from the American Mathematical Society. All contributions intended for publication and all books for review should be addressed to Eugene Isaacson, Chairman, Editorial Committee, Mathematics of Computation, New York University, Courant Institute of Mathematical Sciences, 251 Mercer Street, New York, New York 10012. Institutions sponsoring research reported in the journal are assessed page and microfiche charges.

Each article submitted for publication must be accompanied by a brief and reasonably self-contained abstract, by AMS (MOS) subject classification numbers. If a list of key words and phrases is included, it will be printed as a footnote on the first page. A list of the classification numbers may be found in the Index to Mathematical Reviews, Volume 39 (June 1970).

Microcard Edition

Volumes 1–14 (1943–1960) are available on Microcards at $39.00 for the complete set and may be purchased from Microcard Editions, Inc., 901 26th Street, N. W., Washington, D.C. 20037.

C. WILLIAM GEAR
University of Illinois

NUMERICAL INITIAL VALUE PROBLEMS IN ORDINARY DIFFERENTIAL EQUATIONS

New—Discusses all classes of step by step methods suitable for the automatic numerical integration of general problems. Covers the derivation of methods, the theory of error and convergence, and the practical implementation on a computer. Includes theoretical and computational end-of-the-chapter problems, many numerical examples showing error behavior, numerical comparisons of different methods, and a large bibliography.

● July 1971, approx. 304 pp., $12.95 (62660-6)

PHILIP ANSELONE
Michigan State University

COLLECTIVELY COMPACT OPERATOR APPROXIMATION THEORY

New—Provides an introduction to a currently active field of research, presenting a recently developed abstract operator approximation theory and various applications to numerical integration approximations of integral operators. The theory is based on a new concept, that of a collectively compact (completely continuous) operator. Both linear and nonlinear operators are treated. Valuable for courses and seminars at the graduate level.

● August 1971, 128 pp., $12.50 (14067-3)

GERALD SALTON
Cornell University

THE SMART RETRIEVAL SYSTEM: Experiments in Automatic Document Processing

New—Deals with the design and application of fully automatic information retrieval systems. The design of the automatic SMART document retrieval system is described in the areas of systems evaluation, automatic language analysis, automatic document classification and search, user feedback procedures, adaptive document and query modification, and operational comparisons with conventional manually-based retrieval systems.

● August 1971, 544 pp., $15.00 (81452-5)
