

# Mathematics of Computation

**Coden: MCMPAF**

**Pages 817–1050**

**Volume 26, Number 120**

**October 1972**

*Published by the American Mathematical Society*

PROVIDENCE, RHODE ISLAND

### Editorial Committee

EUGENE ISAACSON, Chairman, New York University, Courant Institute of Mathematical Sciences, 251 Mercer Street, New York, New York 10012  
Assistant to the Chairman: CHARLOTTE W. JOHN

### Board of Associate Editors

- JAMES H. BRAMBLE, Department of Mathematics, Cornell University, Ithaca, New York 14850  
JAMES W. DANIEL, Department of Mathematics, University of Texas at Austin, Austin, Texas 78712  
WALTER GAUTSCHI, Computer Sciences Department, Purdue University, Lafayette, Indiana 47907  
DONALD GOLDFARB, Department of Computer Sciences, School of Engineering, The City College of the City University of New York, 139th Street & Convent Avenue, New York, New York 10031  
ALSTON S. HOUSEHOLDER, Department of Mathematics, Ayres Hall, The University of Tennessee, Knoxville, Tennessee 37916  
HEINZ-OTTO KREISS, Computer Science Department, University of Uppsala, Uppsala, Sturegaten 4, Sweden  
YUDELL L. LUKE, Department of Mathematics, University of Missouri at Kansas City, Kansas City, Missouri 64110  
JAMES N. LYNES, Argonne National Laboratory, 9700 South Cass Avenue, Argonne, Illinois 60439  
BERESFORD PARLETT, Department of Computer Science, University of California, Berkeley, California 94720  
PHILIP RABINOWITZ, Department of Applied Mathematics, The Weizmann Institute of Science, Rehovot, Israel  
DANIEL SHANKS, Naval Ship Research and Development Center, Washington, D.C. 20034  
HANS J. STETTER, Institut für Numerische Mathematik, Technische Hochschule Wien, A-1040 Wien, Karlsplatz 13, Austria  
JOHN W. WRENCH, JR., Naval Ship Research and Development Center, Washington, D.C. 20034

### Information for Subscribers

The journal is published quarterly in one volume per year, with issues numbered serially since Volume 1, Number 1. The subscription price is \$24.00. All back volumes are available. For Volumes 1–19 (1943–1965), prices are \$20.00 per volume; for Volumes 20–23 (1966–1969), \$24.00 per volume and Volumes 24–26 (1970–1972), \$30.00 per volume.

### Unpublished Mathematical Tables

The editorial office of the journal maintains a repository of Unpublished Mathematical Tables (UMT). When a table is deposited in the UMT repository a brief summary of its contents is published in the section *Reviews and Descriptions of Tables and Books*. Upon request, the chairman of the editorial committee will supply copies of any table for a nominal cost per page.

## TABLE OF CONTENTS

OCTOBER 1972

Von Neumann's Comparison Method for Random Sampling from the Normal and Other Distributions . . . . .	GEORGE E. FORSYTHE	817
<b>Obituary—George Elmer Forsythe</b> . . . . .	JAMES W. DANIEL	827
Modification Methods for Inverting Matrices and Solving Systems of Linear Algebraic Equations . . . . .	D. GOLDFARB	829
Monotonicity and Iterative Approximations Involving Rectangular Matrices . . . . .	ROBERT J. PLEMMONS	853
On the Solution of Block-Tridiagonal Systems Arising from Certain Finite-Difference Equations . . . . .	J. M. VARAH	859
Projection Methods for Dirichlet's Problem in Approximating Polygonal Domains with Boundary-Value Corrections . . . . .	JAMES H. BRAMBLE, TODD DUPONT & VIDAR THOMÉE	869
Discrete Galerkin and Related One-Step Methods for Ordinary Differential Equations . . . . .	BERNIE L. HULME	881
On the Solution of the Equations Arising from Collocation with Cubic <i>B</i> -Splines . . . . .	RICHARD F. SINCOVEC	893
Endpoint Formulas for Interpolatory Cubic Splines . . . . .	THOMAS I. SEIDMAN & ROBERT J. KORSAN	897
Remark on a Paper by Huddleston . . . . .	GERHARD MERZ	901
The Integral Analog of the Leibniz Rule . . . . .	THOMAS J. OSLER	903
How Slowly Can Quadrature Formulas Converge? . . . . .	PETER R. LIPOW & FRANK STENGER	917
The Condition of Orthogonal Polynomials . . . . .	WALTER GAUTSCHI	923
On the General Hermite Cardinal Interpolation . . . . .	R. KRESS	925
Optimal Multiplication Chains for Computing a Power of a Symbolic Polynomial . . . . .	W. MORVEN GENTLEMAN	935
Note on Backward Recurrence Algorithms . . . . .	F. W. J. OLVER & D. J. SOOKNE	941
Complex Zeros of the Modified Bessel Function $K_n(Z)$ . . . . .	R. PARNES	949
High Precision Evaluation of the Irregular Coulomb Wave Functions . . . . .	A. J. STRECK & J. A. GREGORY	955
The Asymptotic Expansion of a Hypergeometric Function ${}_2F_2(1, \alpha; \rho_1, \rho_2; z)$ . . . . .	SHOON K. KIM	963
An Explicit Addition Formula for the Inverse Jacobian Elliptic Functions . . . . .	HENRY E. FETTIS	965
A Unified Presentation of Certain Classical Polynomials . . . . .	H. M. SRIVASTAVA & J. P. SINGHAL	969
Diophantine Approximation of Ternary Linear Forms. II . . . . .	T. W. CUSICK	977
Some Prime Numbers of the Forms $2A3^n + 1$ and $2A3^n - 1$ . . . . .	H. C. WILLIAMS & C. R. ZARNKE	995
Numerical Investigation of Certain Asymptotic Results in the Theory of Partitions . . . . .	M. S. CHEEMA & W. E. CONWAY	999
Table of Irreducible Polynomials Over GF[2] of Degrees 10 Through 20 . . . . .	SVEIN MOSSIGE	1007
Note on Representing a Prime as a Sum of Two Squares . . . . .	JOHN BRILLHART	1011

### Information for Contributors

Manuscripts should be typewritten double-spaced in the format used by the journal. For journal abbreviations, see the latest *Mathematical Reviews* volume index. An author should submit the original and one copy of the manuscript and retain one copy. The author may suggest an appropriate editor for his paper. It is recommended that the author acquaint himself with the pertinent material contained in "Information for Contributors to Mathematics of Computation" and "Manual for Authors," both of which are available upon request from the American Mathematical Society. All contributions intended for publication and all books for review should be addressed to Eugene Isaacson, Chairman, Editorial Committee, Mathematics of Computation, New York University, Courant Institute of Mathematical Sciences, 251 Mercer Street, New York, New York 10012. Institutions sponsoring research reported in the journal are assessed page and microfiche charges.

Each article submitted for publication must be accompanied by a brief and reasonably self-contained abstract, and by AMS (MOS) subject classification numbers. If a list of key words and phrases is included, it will be printed as a footnote on the first page. A list of the classification numbers may be found in the Index to Mathematical Reviews, Volume 39 (June 1970).

---

### Microcard Edition

Volumes 1-14 (1943-1960) are available on Microcards at \$39.00 for the complete set and may be purchased from Microcard Editions, Inc., 901 26th Street, N. W., Washington, D.C. 20037.

# NEW FOR 1973

## **ALGORITHMS FOR MINIMIZATION WITHOUT DERIVATIVES**

Richard P. Brent, *IBM Corporation*

NEW—A thorough description and analysis of practical methods for finding approximate zeros and minima of functions. A chapter on methods for global minimization is included. All the methods discussed are for use on a digital computer. Convergence properties are examined and error bounds given, taking the effect of rounding errors into account. Reliable FORTRAN and ALGOL programs are given.

September 1973 208pp. cloth  
(013-022335-2)

## **NUMERICAL ANALYSIS OF SYMMETRIC MATRICES**

H.R. Schwartz, H. Rutishauser, and C. Stiefel, *Eidgenössische Technische Hochschule, Zurich, Switzerland*. NEW—Develops the powerful techniques involved, accentuating those which lend themselves to efficient use of a digital computer. Extensive treatment of relaxation, method of conjugate gradients, method of steepest descents, Cholesky's Method, successive displacements method, simultaneous displacements method, eigenvalue problems, Jacobi Method, Givens' and Householder's Method, LR transformation, QD algorithm, and boundary-value problems.

January 1973 320pp. cloth  
(013-626556-1)

## **SPLINE ANALYSIS**

Martin H. Schultz, *Yale University*

NEW—Introduction to the theory, applications, and computational aspects of finite element (e.g., piecewise polynomial or spline) methods in numerical analysis. First book on the subject—applications include single and multi-dimensional interpolation, least squares approximation, linear integral equations, linear and semi-linear elliptic boundary value problems, eigenvalue problems, linear and semi-linear parabolic initial-boundary value problems, and optimal control problems.

January 1973 176pp. cloth  
(013-835405-7)

## **IMPLEMENTING SOFTWARE FOR NON-NUMERIC APPLICATIONS**

Willim M. Waite,

*University of Colorado*

NEW—A detailed selection of techniques required for list processing, dynamic storage management, and string manipulation. Emphasis is on the engineering of software to perform non-numeric tasks. Time and space requirements for various algorithms are explored. Discussion of all techniques include explicit "how to implement" information plus details of possible tradeoffs.

January 1973 528pp. cloth  
(013-451898-5)

# INDEX TO MATHEMATICS OF COMPUTATION, 1943—1969

462 + xviii pages; list price \$19.95; institutional member price \$14.96; individual member price \$9.97

ISBN 0-8218-4000-2; to order, please specify MCOMIN/1

The INDEX TO MATHEMATICS OF COMPUTATION is a compilation, by author and by subject, of all material which has appeared in MATHEMATICS OF COMPUTATION and its predecessor, MATHEMATICAL TABLES AND OTHER AIDS TO COMPUTATION, during the years 1943—1969—twenty-three published volumes. The INDEX contains over 7,000 entries. This is an unusual compilation because of the unique character of the journal which not only publishes research papers, but also publishes reviews of material on mathematics of computation and a table errata section covering a number of other publications. In addition, an unpublished mathematical tables (UMT) file is maintained.

A new classification system, which was developed in 1969 by a committee chaired by Yudell Luke at the Midwest Research Institute, is used in the *subject classification index*. In this section, all articles, tables, reviews, etc. are classified. The classification scheme is designed as an indexing system for retrieval of information in MATHEMATICS OF COMPUTATION, and the present index contains classification numbers for all entries beginning with 1943.

The *author index* has been set up so that it gives bibliographical information on all of the items published in the journal. Information in this index includes title of article; translated title of books not in English, French, German, or Italian; title of book which is a collection of articles written by a number of authors; volume, year, and number of pages; publisher of a book; journal title of periodicals, information concerning translations; MATHEMATICAL REVIEWS numbers; subject classification. Items are listed alphabetically by author and chronologically under each author's entry. Each article is identified by both an ordering numeral and an identifying code in order that the reader may tell quickly whether the information listed concerns a primary research publication, a review of the work, errata to a table, or any of the other types of information covered by the journal. The following codes are used:

P = research paper	E = table errata
R = review of article or book	Q = queries and replies
T = table in UMT (unpublished mathematical table) file	M = microfiche

These identifying codes appear in the *subject classification index*, also, to refer the reader to the *author index*.

The identifying code appearing in both indexes provides a cross-reference system that enables the reader to retrieve information rapidly. For example, if the following entry appears in the *subject classification index*

3.10 Linear Equations  
Smith, A. B. 1 PR, 3E

the reader knows immediately that under Smith's name in the *author index*, there will be listed both a research article on the subject of linear equations, written by Smith, and a review of the article. In addition, an errata to a table which Smith published in another journal will be listed.

The preparation and publication of the *subject classification index* was supported in part by a grant from the National Science Foundation (GN-691).

## Additional Audio Recordings of Mathematical Lectures..\$10 per lecture

57. Missed opportunities, FREEMAN J. DYSON
58. Frobenius and the Hodge filtration, BARRY MAZUR
59. Set theory and general topology, MARY ELLEN RUDIN
60. Some applications of an axiomatic theory of sheaves,  
MYLES TIERNEY
61. Equivariant real algebraic differential topology,  
RICHARD S. PALAIS
62. Foliations of compact manifolds, H. BLAINE LAWSON
63. Lie dynamical systems, LAWRENCE MARKUS
64. The deficiency index problem for ordinary selfadjoint  
differential operators, ALLEN DEVINATZ
65. On automorphism groups of induced CR structure,  
HUGO ROSSI
66. The structure of attractors, ROBERT F. WILLIAMS
67. Complexity of statement, computation, and proof,  
JACOB T. SCHWARTZ
68. Powers of singular cardinals, ROBERT M. SOLOVAY
69. Determination of codon frequencies and sequence structure  
of polynucleotides, HANS J. BREMERMAN

Please circle number(s) when ordering.

The following lectures are available at \$10.00: 57 58 59 60 61 62 63 64 65  
66 67 68 69

Each lecture is accompanied by a manual. Extra manuals are 30¢ each.

# mathematical title service

You can't read two hundred journals a month and pinpoint the specific articles related to your own work. Let the Mathematical Title Service do it for you!!! For \$0.10 each, we can send you title listings which include author's name, title of article, source journal with volume, year, issue, pages, and all primary and secondary classification numbers. The only thing we need from you is a profile of your interests and a deposit balance of \$30. The computer helps us—let us help you. Drop us a postcard, and you will receive complete information posthaste.

---

# index of mathematical papers

Your reference library will not be complete without IMP! This new index series is scheduled to appear every six months after publication of the first four issues. It will be arranged by author(s) and subject, and it will provide your readers with approximately 5,000 bibliographic references (per issue) in all areas of pure mathematics; important topics in applied mathematics and mathematical physics; and mathematical applications in the other physical, biological, and social sciences. This is a current index, covering over half of the journals now reviewed in full by *Mathematical Reviews*. Standing orders are invited. No discount is offered on these publications.

Volume 1, July—December 1970 . . . . .	\$30
Volume 2, Issue 1, January—June 1971 . . . .	30
Volume 2, Issue 2, July—December 1971 . . .	30
Volume 3, Issue 1, January—June 1972 . . . .	40
