

Mathematics of Computation

Coden: MCMPAF

Pages 889 – 1204

Volume 28, Number 128

October 1974

Published by the American Mathematical Society

PROVIDENCE, RHODE ISLAND

Editorial Committee

- EUGENE ISAACSON, Chairman, New York University, Courant Institute of Mathematical Sciences, 251 Mercer Street, New York, New York 10012
JAMES H. BRAMBLE, Department of Mathematics, Cornell University, Ithaca, New York 14850
ALSTON S. HOUSEHOLDER, Department of Mathematics, Ayres Hall, The University of Tennessee, Knoxville, Tennessee 37916
JOHN W. WRENCH, JR., Naval Ship Research and Development Center, Bethesda, Maryland 20084

Technical Editor

- CHARLOTTE W. JOHN, New York University, Courant Institute of Mathematical Sciences, 251 Mercer Street, New York, New York 10012

Board of Associate Editors

Information for Subscribers

The journal is published quarterly in one volume per year, with issues numbered serially since Volume 1, Number 1. Annual subscription rates are: list \$36.00, institutional member \$24.00, individual AMS member \$10.00, member of CBMS organizations \$15.00. All back volumes are available. For Volumes 1–19 (1943–1965), prices are \$20.00 per volume; for Volumes 20–23 (1966–1969), \$24.00 per volume; Volumes 24–26 (1970–1972), \$30.00 per volume and for Volume 27 (1973), \$36.00.

Back volumes of *Mathematics of Computation* are available on 16 mm. microfilm. Volumes 1–27 (1943–1973) are available as a set; prices are \$200.00 for spools and \$218.00 for cartridges. Only current subscribers will be eligible to purchase back volumes on microfilm.

Unpublished Mathematical Tables

The editorial office of the journal maintains a repository of Unpublished Mathematical Tables (UMT). When a table is deposited in the UMT repository a brief summary of its contents is published in the section *Reviews and Descriptions of Tables and Books*. Upon request, the chairman of the editorial committee will supply copies of any table for a nominal cost per page.

Subscriptions and orders for publications of the American Mathematical Society should be addressed to American Mathematical Society, P. O. Box 1571, Annex Station, Providence, R. I. 02901. All orders must be accompanied by payment. Other correspondence should be addressed to P. O. Box 6248, Providence, R. I. 02940.

Microfilm Editions of Back Volumes of AMS Journals

BULLETIN OF THE
AMERICAN MATHEMATICAL SOCIETY
Volumes 1-79, 1894-1973
14 reels, \$575 Cartridges, \$617

MATHEMATICS OF COMPUTATION
Volumes 1-27, 1943-1973
4 reels, \$200 Cartridges, \$212

PROCEEDINGS OF THE
AMERICAN MATHEMATICAL SOCIETY
Volumes 1-41, 1950-1973
8 reels, \$280 Cartridges, \$304

MATHEMATICAL REVIEWS
Volumes 1-46, 1940-1973
39 reels, \$1,430 Cartridges, \$1,547

The journals above can be purchased as
a package with a discount of 20% for
\$1,988 (reels) or \$2,183 (cartridges,
whose cost of \$3 each is not discounted)

CHINESE MATHEMATICS—ACTA
Volumes 1-9, 1962-67
2 reels, \$110 Cartridges, \$116

MATHEMATICS OF THE USSR—SBORNIK
Volumes 1-18, 1967-72
3 reels, \$610 Cartridges, \$619

MATHEMATICS OF THE USSR—IZVESTIJA
Volumes 1-6, 1967-72
2 reels, \$420 Cartridges \$426

SOVIET MATHEMATICS—DOKLADY
Volumes 1-14, 1960-73
6 reels, \$390 Cartridges, \$408

The translation journals above can be
purchased as a package with a discount of
25% for \$1,148 (reels) or \$1,187
(cartridges)

The microfilm for all of the journals mentioned
above is 16 mm. Several options are available:
the microfilm may be either negative or positive
and may be mounted either on reels or in Eastman
or 3M cartridges.

Orders are now being accepted. Except for
Chinese Mathematics—Acta, only current sub-
scribers will be eligible to purchase back volumes
on microfilm.

THE CHEBYSHEV POLYNOMIALS

By Theodore J. Rivlin, IBM Corporation

This balanced, distinctive book does more than describe Chebyshev methods. It shows you how to **apply** them. Providing a selected survey of the most important properties of the Chebyshev polynomials, it gives you a storehouse of information in a concise, readable style. At the same time, it uses the example of the Chebyshev polynomials to introduce such important and vital areas of mathematical analysis as interpolation theory, orthogonal polynomials, approximation theory, numerical integration, numerical analysis, and ergodic theory.

The Chebyshev Polynomials features . . .

- a precise description of the Lebesgue constants for polynomial interpolation in the zeros of the Chebyshev polynomials
- material appearing in English for the first time—Duffin and Schaeffer's refinement of the useful Markov bound on the derivative of a polynomial
- material on iterative properties appearing in book form for the first time
- new results on numerical integration theory
- emphasis on problems of the best uniform approximation
- over 200 exercises, some of which encourage you to obtain substantial results **on your own**.

You'll find this book not only informative, but readable and enjoyable as well. To get your copy, fill out the coupon below and mail it **today!**

A volume in Pure and Applied Mathematics: A Wiley-Interscience Series of Texts, Monographs and Tracts—Richard Courant, Founder; Lipman Bers, Peter Hilton, and Harry Hochstadt, Advisory Editors.

Selected Tables in Mathematical Statistics

Edited by the Institute of Mathematical Statistics

A new series...

Each volume contains several sets of extensive tables.

Volume 1

(ISBN 0-8218-1901-1)

403 pages

\$8.60 list

\$6.45 for members

A reprint – with corrections – of the volume first published in 1970 by Markham Publishing Company.

Tables of the cumulative non-central chi-square distribution

G. E. HAYNAM, Z. GOVINDARAJULU, and F. C. LEONE (78 pages)

Tables of the exact sampling distribution of the two-sample Kolmogorov-Smirnov criterion D_{mn} ($m \leq n$)

P. J. KIM and R. I. JENNRICH (92 pages)

Critical values and probability levels for the Wilcoxon rank sum test and the Wilcoxon signed rank test

FRANK WILCOXON, S. K. KATTI, and ROBERTA A. WILCOX (90 pages)

The null distribution of the first three product-moment statistics for exponential, half-gamma, and normal scores

P. A. W. LEWIS and A. S. GOODMAN (62 pages)

Tables to facilitate the use of orthogonal polynomials for two types of error structures

KIRKLAND B. STEWART (81 pages)

Volume 2

(ISBN 0-8218-1902-X)

388 pages

\$14.10 list

\$10.58 for members

Probability integral of the doubly noncentral t -distribution with degrees of freedom n and non-centrality parameters δ and λ

WILLIAM G. BULGREN (138 pages)

Doubly noncentral F distribution – Tables and Applications

M. L. TIRU (38 pages)

Tables of expected sample size for curtailed fixed sample size tests of a Bernoulli parameter

COLIN R. BLYTH and DAVID HUTCHINSON (22 pages)

Zonal polynomials of order 1 through 12

A. M. PARKHURST and A. T. JAMES (190 pages)

Volume 3

In preparation. Contributions for future volumes are solicited. Refer to preface in Volume 1 or Volume 2 for details.

Donald B. Owen, Chairman of the IMS Committee on Tables,

is a co-editor with H. Leon Harter.

James M. Davenport is managing editor.

Mathematics of Computation

TABLE OF CONTENTS

OCTOBER 1974

On Tikhonov's Method for Ill-Posed Problems	JOEL N. FRANKLIN	889
Estimates Near Plane Portions of the Boundary for Discrete Elliptic Boundary Problems	C. G. L. JOHNSON	909
Interior Estimates for Ritz-Galerkin Methods JOACHIM A. NITSCHKE & ALFRED H. SCHATZ		937
An Observation Concerning Ritz-Galerkin Methods with Indefinite Bilinear Forms	ALFRED H. SCHATZ	959
Error Estimates for the Approximation of a Class of Variational Inequalities RICHARD S. FALK		963
On the Eigenvectors of a Finite-Difference Approximation to the Sturm-Liouville Eigenvalue Problem	ECKART GEKELER	973
A Variable Order Finite-Difference Method for Nonlinear Multipoint Boundary Value Problems	M. LENTINI & V. PEREYRA	981
The Application of Invariant Imbedding to the Solution of Linear Two-Point Boundary Value Problems on an Infinite Interval	DALE W. ALSPAUGH	1005
Semianalytic Numerical Studies of Turning Points Arising in Stiff Boundary Value Problems	W. L. MIRANKER & J. P. MORREEUW	1017
Exponential Fitting of Matricial Multistep Methods for Ordinary Differential Equations	E. F. SARKANY & W. LINIGER	1035
A Nonexistence Theorem for Explicit A -Stable Methods OLAVI NEVANLINNA & AARNE H. SIPILÄ		1053
Algebraic-Numerical Method for the Slightly Perturbed Harmonic Oscillator A. NADEAU, J. GUYARD & M. R. FEIX		1057
On the Modification of LDL^T Factorizations R. FLETCHER & M. J. D. POWELL		1067
Inversion of Toeplitz Band Matrices	WILLIAM F. TRENCH	1089
Existence Questions for the Problem of Chebyshev Approximation by Interpolating Rationals	G. D. TAYLOR & J. WILLIAMS	1097
Some Problems in Optimally Stable Lagrangian Differentiation HERBERT E. SALZER		1105
On the Distribution of Pseudo-Random Numbers Generated by the Linear Congruential Method. II	HARALD NIEDERREITER	1117
A Quadratic Partition of Primes $\equiv 1 \pmod{7}$	KENNETH S. WILLIAMS	1133
The Simplest Cubic Fields	DANIEL SHANKS	1137
An Inequality About Factors of Polynomials	M. MIGNOTTE	1153
Computing in $GF(q)$	JACOB T. B. BEARD, JR.	1159
Some Primitive Polynomials of the Third Kind JACOB T. B. BEARD, JR. & KAREN I. WEST		1166
Factorization Tables for $x^n - 1$ Over $GF(q)$ JACOB T. B. BEARD, JR. & KAREN I. WEST		1167
