**SUBSCRIPTION INFORMATION:** MATHEMATICS OF COMPUTATION is published quarterly, with issues numbered serially since Volume 1, Number 1. Subscription prices for Volumes 48 and 49 (1987) are \$174.00 list; \$139.00 institutional member; \$113.00 member of CBMS organizations; \$104.00 individual AMS member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of \$8.00; subscribers in India must pay a postage surcharge of \$18.00. Combination paper and microfiche subscription prices are \$231.00 list; \$185.00 institutional member. Microfiche of each issue will be mailed the fastest way before the issue is mailed by the printer.

**BACK NUMBER INFORMATION:** Back number prices *per volume* are for Volumes 1-21, \$80.00 list, \$64.00 member; for Volumes 22-33, \$120.00 list, \$96.00 institutional member; for Volumes 34-43, \$80.00 list, \$64.00 institutional member; Volumes 44-45, \$113.00 list, \$90.00 institutional member; Volumes 46-47, \$123.00 list, \$98.00 institutional member. Back volumes may be purchased on microfilm or microfiche from University Microfilms International, 300 North Zeeb Road, Ann Arbor, MI 48106.

**UNPUBLISHED MATHEMATICAL TABLES:** The editorial office of the journal maintains a repository of Unpublished Mathematical Tables (UMT). When a table is deposited in the UMT repository a brief summary of its contents is published in the section *Reviews and Descriptions of Tables and Books*. Upon request, the chairman of the editorial committee will supply copies of any table for a nominal cost per page. All tables and correspondence concerning the UMT should be sent to Walter Gautschi, Chairman, Editorial Committee, Mathematics of Computation, Department of Computer Sciences, Purdue University, West Lafayette, IN 47907.

Orders for subscriptions and publications of the American Mathematical Society should be addressed to the AMS, P.O. Box 1571, Annex Station, Providence, RI 02901-9930. *All orders must be accompanied by payment.* Other correspondence should be addressed to P.O. Box 6248, Providence, RI 02940.

MATHEMATICS OF COMPUTATION is published quarterly by the American Mathematical Society, 201 Charles Street, Providence, RI 02940. Second-class postage is paid at Providence, Rhode Island, and additional mailing offices. Postmaster: Send address changes to Mathematics of Computation, American Mathematical Society, P.O. Box 6248, Providence, RI 02940.

<b>Coleman and Russell A. Smith</b> .....	S1

### Information for Contributors

Authors are encouraged to prepare articles electronically with the AMS-TeX software package in the AMS pre-print style and to provide the article in this electronic form for typesetting. While this procedure may not reduce the interval between submission and publication of an article, generally much more accurate copy will be returned for proofreading. Production time for manuscripts prepared with other systems, even TeX itself without AMS-TeX, currently prevents cost-effective use of the existing electronic form. Before sending an AMS-TeX manuscript for typesetting, contact the AMS Composition Department for details.

Manuscripts prepared by some means other than AMS-TeX should be double-spaced and produced in the format used by the journal. For journal abbreviations, see the latest *Mathematical Reviews* volume index. An author should submit the original and two copies of the manuscript and retain one copy. The author may suggest an appropriate editor for his paper. It is recommended that the author acquaint himself with the pertinent material contained in “A Manual for Authors of Mathematical Papers,” which is available from the American Mathematical Society. All contributions intended for publication and all books for review should be addressed to Walter Gautschi, Chairman, Editorial Committee, Mathematics of Computation, Department of Computer Sciences, Purdue University, West Lafayette, Indiana 47907. The date received, which is published with the final version of an accepted paper, is the date received in the office of the Chairman of the Editorial Committee, and it is the responsibility of the author to submit manuscripts directly to this office. Institutions sponsoring research reported in the journal are assessed page and microfiche charges.

Each article submitted for publication must be accompanied by a brief and reasonably self-contained abstract, and by 1980 *Mathematics Subject Classification* (1985 *Revision*) numbers. If a list of key words and phrases is included, it will be printed as a footnote on the first page. A list of the classification numbers may be found in the 1984 Subject Index to Mathematical Reviews.

The research journals of the American Mathematical Society carry a page charge of \$50.00 per page to help defray the cost of publication. This amount is charged to the institution or to a contract supporting the research reported in the published paper. The publication charge policy of the United States Federal Council for Science and Technology (FCST) is reported on page 112 of the February, 1975 issue of the NOTICES of the American Mathematical Society. In no case is the author personally responsible for paying the page charge, nor is acceptance of the author’s paper for publication dependent upon payment of the page charge.

### Copying and Reprinting

Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner’s consent for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law, provided that the fee of \$1.00 plus \$.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.

## **AN INTRODUCTION TO MATHEMATICAL LOGIC AND TYPE THEORY TO TRUTH THROUGH PROOF**

**Peter B. Andrews**

This textbook for advanced undergraduates and beginning graduate students starts with a study of propositional calculus and first-order logic, then provides an introduction to typed  $\lambda$ -calculus, proving the classical completeness, incompleteness, and undecidability results within this context. Of the languages of symbolic logic, typed  $\lambda$ -calculus is the most suitable for use in automated mathematical systems.

1986, 320 pp. \$29.95 Paperback/ISBN 0-12-058536-7

\$55.00 Casebound/ISBN 0-12-058535-9

## **CURVE AND SURFACE FITTING**

**An Introduction**

**Peter Lancaster and Kestutis Salkauskas**

**CONTENTS:** Functions and Graphs. Curve Fitting with Polynomials. Interpolation with Piecewise Polynomial Functions. Curve Fitting with Cubic Splines. Curve Fitting and Projectors. Criteria for Curve and Surface Fitting. Surface Fitting with Polynomials. Surface Interpolation by Tensor Product and Blending Methods. Finite Element Methods. Moving Least Squares and Composite Methods. Surface Splines.

1986, 292 pp. \$29.50 Paperback/ISBN 0-12-436061-0

\$64.00 Casebound/ISBN 0-12-436060-2

## **INTRODUCTION TO SOBOLEV SPACES AND FINITE ELEMENT SOLUTIONS OF ELLIPTIC BOUNDARY VALUE PROBLEMS**

**J.T. Marti**

**Translation editor: J.R. Whiteman**

The author, whose previous books have been praised for their lucid style and mathematical substance, presents a thorough introduction to finite element methods, Sobolev spaces, and their applications. The reader is assumed to have an undergraduate background in mathematical analysis.

1986, 218 pp. \$48.00 Casebound/ISBN 0-12-474510-5

## **FINITE ELEMENT ANALYSIS FOR UNDERGRADUATES**

**J. Ed Akin**

**CONTENTS:** Introductory Concepts. Matrix Notation and Operations. The Direct Approach in 1-D. Mathematical Formulations in 1-D. Element Interpolation and Local Coordinates. Exact and Numerical Integration in 1-D. Truss Elements and Coordinate Transformation. Beam Analysis. Transient Analysis, 1-D Examples. Error Concepts. Interpolation and Integration in 2-and 3-D. 2-D Heat Transfer. Plane Stress Analysis. Axisymmetric Analysis. Simple Harmonic Motion and Eigenvalue Problems.

1987, 336 pp. \$40.00 Casebound/ISBN 0-12-047655-X

\$20.00 Paperback/ISBN 0-12-047656-8

# The Joy of T<sub>E</sub>X

## A Gourmet Guide to Typesetting with the $\text{\textit{AMS-T}_E\text{X}}$ macro package

M. D. SPIVAK, Ph.D.

*The Joy of T<sub>E</sub>X* is the user-friendly user's guide for  $\text{\textit{AMS-T}_E\text{X}}$ , an extension of T<sub>E</sub>X, Donald Knuth's revolutionary program for typesetting technical material.  $\text{\textit{AMS-T}_E\text{X}}$  was designed to simplify the input of mathematical material in particular, and to format the output according to any of various preset style specifications.

There are two primary features of the T<sub>E</sub>X system: it is a computer system for typesetting technical text, especially text containing a great deal of mathematics; and it is a system for producing beautiful text, comparable to the work of the finest printers.

Most importantly, T<sub>E</sub>X's capabilities are not available only to T<sub>E</sub>Xperts. While mathematicians and experienced technical typists will find that T<sub>E</sub>X allows them to specify mathematical formulas with greater accuracy and still have great control over

the finished product, even novice technical typists will find the manual easy to use in helping them produce beautiful technical T<sub>E</sub>Xt.

This book is designed as a user's guide to the  $\text{\textit{AMS-T}_E\text{X}}$  macro package and details many features of this extremely useful text processing package. Parts 1 and 2, entitled "Starters" and "Main Courses," teach the reader how to typeset most normally encountered text and mathematics. "Sauces and Pickles," the third section, treats more exotic problems and includes a 60-page dictionary of special T<sub>E</sub>Xniques.

Exercises sprinkled generously through each chapter encourage the reader to sit down at a terminal and learn through experimentation. Appendixes list summaries of frequently used and more esoteric symbols as well as answers to the exercises.
