SUBSCRIPTION INFORMATION: MATHEMATICS OF COMPUTATION is published quarterly, with issues numbered serially since Volume 1, Number 1. Subscription prices for Volumes 50 and 51 (1988) are $181.00 list; $145.00 institutional member; $118.00 member of CBMS organizations; $109.00 individual AMS member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmember institutions and organizations after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $8.00; subscribers in India must pay a postage surcharge of $18.00. Combination paper and microfiche subscription prices are $241.00 list; $193.00 institutional member. Microfiche of each issue will be mailed the fastest way before the issue is mailed by the printer.

BACK NUMBER INFORMATION: Back number prices *per volume* are for Volumes 1–21, $82.00 list, $66.00 member; for Volumes 22–33, $124.00 list, $99.00 institutional member; for Volumes 34–43, $82.00 list, $64.00 institutional member; Volumes 44–45, $113.00 list, $90.00 institutional member; Volumes 46–47, $127.00 list, $102.00 institutional member; Volumes 48–49, $135.00 list, $108.00 institutional member. Back volumes may be purchased on microfilm or microfiche from University Microfilms International, 300 North Zeeb Road, Ann Arbor, MI 48106.

UNPUBLISHED MATHEMATICAL TABLES: The editorial office of the journal maintains a repository of Unpublished Mathematical Tables (UMT). When a table is deposited in the UMT repository a brief summary of its contents is published in the section *Reviews and Descriptions of Tables and Books.* Upon request, the chairman of the editorial committee will supply copies of any table for a nominal cost per page. All tables and correspondence concerning the UMT should be sent to Walter Gautschi, Chairman, Editorial Committee, Mathematics of Computation, Department of Computer Sciences, Purdue University, West Lafayette, IN 47907.

Orders for subscriptions and publications of the American Mathematical Society should be addressed to the AMS, P.O. Box 1571, Annex Station, Providence, RI 02901-9930. *All orders must be accompanied by payment.* Other correspondence should be addressed to P.O. Box 6248, Providence, RI 02940.

MATHEMATICS OF COMPUTATION is published quarterly by the American Mathematical Society, 201 Charles Street, Providence, RI 02940. Second-class postage is paid at Providence, Rhode Island, and additional mailing offices. Postmaster: Send address changes to Mathematics of Computation, American Mathematical Society, P.O. Box 6248, Providence, RI 02940.

TABLE OF CONTENTS

October 1988

James H. Bramble, Joseph E. Pasciak, and Jinchao Xu, The Analysis of Multigrid Algorithms for Nonsymmetric and Indefinite Elliptic Problems 389

James H. Bramble, Joseph E. Pasciak, and Alfred H. Schatz, The Construction of Preconditioners for Elliptic Problems by Substructuring, III 415

Peter A. Markowich and Miloš A. Zlámal, Inverse-Average-Type Finite Element Discretizations of Selfadjoint Second-Order Elliptic Problems ... 431

P. B. Monk, An Iterative Finite Element Method for Approximating the Biharmonic Equation 451

X. Y. Liu and Y. M. Chen, Convergence of a Generalized Pulse-Spectrum Technique (GPST) for Inverse Problems of 1-D Diffusion Equations in Space-Time Domain 477

R. Durán, R. H. Nochetto, and Junping Wang, Sharp Maximum Norm Error Estimates for Finite Element Approximations of the Stokes Problem in $2 - D$ 491

C. Chiu and R. A. Nicolaides, Convergence of a Higher-Order Vortex Method for Two-Dimensional Euler Equations 507

Richard Sanders, A Third-Order Accurate Variation Nonexpansive Difference Scheme for Single Nonlinear Conservation Laws 535

Dalia Fishelov, The Spectrum and the Stability of the Chebyshev Collocation Operator for Transonic Flow 559

Thomas Hagstrom and S. I. Hariharan, Accurate Boundary Conditions for Exterior Problems in Gas Dynamics 581

D. Funaro and D. Gottlieb, A New Method of Imposing Boundary Conditions in Pseudospectral Approximations of Hyperbolic Equations 599

Claudio Canuto, Spectral Methods and a Maximum Principle 615

Eugene C. Gartland, Jr., Graded-Mesh Difference Schemes for Singularly Perturbed Two-Point Boundary Value Problems 631

Kathryn E. Brenan and Bjorn E. Engquist, Backward Differentiation Approximations of Nonlinear Differential/Algebraic Systems 659

M. van Veldhuizen, Convergence Results for Invariant Curve Algorithms ... 677

Bengt Fornberg, Generation of Finite Difference Formulas on Arbitrarily Spaced Grids 699

Myong-Hi Kim, On Approximate Zeros and Rootfinding Algorithms for a Complex Polynomial 707

Ping Tak Peter Tang, A Fast Algorithm for Linear Complex Chebyshev Approximations 721

Philip Rabinowitz, Convergence Results for Piecewise Linear Quadratures for Cauchy Principal Value Integrals 741

Walter Gautschi and Theodore J. Rivlin, A Family of Gauss-Kronrod Quadrature Formulae 749

G. W. Stewart, A Curiosity Concerning the Representation of Integers in Noninteger Bases 755

Jürgen Eichenauer, Jürgen Lehn, and Alev Topuzoğlu, A Nonlinear Congruential Pseudorandom Number Generator with Power of Two Modulus 757
Gunter Malle, Polynomials with Galois Groups $\mathrm{Aut}(M_{22})$, M_{22}, and $\mathrm{PSL}_3(\mathbb{F}_4) \cdot 2_2$ Over $\mathbb{Q}$ 761
Shigefumi Mori, David R. Morrison, and Ian Morrison, On Four-Dimensional Terminal Quotient Singularities 769
Harvey Cohn, Fricke's Two-Valued Modular Equations 787
A. J. Stephens and H. C. Williams, Computation of Real Quadratic Fields with Class Number One 809
Noam D. Elkies, On $A^4 + B^4 + C^4 = D^4$ 825
J. A. Abbott and J. H. Davenport, A Remark on a Paper by Wang: Another Surprising Property of 42 837
Reviews and Descriptions of Tables and Books 841
Mohamed and Walsh, Editors **34**, Kinnmark **35**, Sachdev **36**
Indexes to Volumes 50 and 51 845
Supplement to "Backward Differentiation Approximations of Nonlinear Differential/Algebraic Systems" by **Kathryn E. Brenan and Bjorn E. Engquist** S7

Information for Contributors and information on Copying and Reprinting can be found after the supplements section at the end of this issue.

Information for Contributors

Authors are encouraged to prepare articles electronically with the $\mathcal{A}\mathcal{M}\mathcal{S}$-TEX software package in the AMS pre-print style and to provide the article in this electronic form for typesetting. While this procedure may not reduce the interval between submission and publication of an article, generally much more accurate copy will be returned for proofreading. Production time for manuscripts prepared with other systems, even TEX itself without $\mathcal{A}\mathcal{M}\mathcal{S}$-TEX, currently prevents cost-effective use of the existing electronic form. Before sending an $\mathcal{A}\mathcal{M}\mathcal{S}$-TEX manuscript for typesetting, contact the AMS Composition department for details.

Manuscripts prepared by some means other than $\mathcal{A}\mathcal{M}\mathcal{S}$-TEX should be doubled-spaced and produced in the format used by the journal. For journal abbreviations, see the latest *Mathematical Reviews* volume index. An author should submit the original and two copies of the manuscript and retain one copy. The author may suggest an appropriate editor for his paper. It is recommended that the author acquaint himself with the pertinent material contained in "A Manual for Authors of Mathematical Papers," which is available from the American Mathematical Society. All contributions intended for publication and all books for review should be addressed to Walter Gautschi, Chairman, Editorial Committee, Mathematics of Computation, Department of Computer Sciences, Purdue University, West Lafayette, Indiana 47907. The date received, which is published with the final version of an accepted paper, is the date received in the office of the Chairman of the Editorial Committee, and it is the responsibility of the author to submit manuscripts directly to this office.

Each article submitted for publication must be accompanied by a brief and reasonably self-contained abstract, and by 1980 *Mathematics Subject Classification* (1985 *Revision*) numbers. If a list of key words and phrases is included, it will be printed as a footnote on the first page. A list of the classification numbers may be found in the 1984 Subject Index to Mathematical Reviews. Authors are also encouraged to supply electronic addresses when available. These will be printed after the postal address at the end of each article.

Copying and Reprinting

Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addessed to the Executive Director, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.

The Joy of TEX

A Gourmet Guide to Typesetting with the AMS-TEX macro package

M. D. SPIVAK

The Joy of TEX is the user-friendly user's guide for AMS-TEX, an extension of TEX, which was especially designed to simplify the input of mathematical material and to format the output according to any of various preset style specifications.

There are two primary features of the TEX system: it is a computer system for typesetting technical text, especially text containing a great deal of mathematics; and it is a system for producing beautiful text, plain or technical, which is comparable to the work of the finest printers.

One of the strengths of TEX is its ability to use macros aggregates of several commands into one and Spivak has created a collection of macros that makes the preparation of mathematical text for printing a true *Joy*.

Chapters cover: ordinary text and control sequences, changing fonts, running a file through TEX, spacing and line breaking, symbols and accents, formatting a paper, formulas in text, displayed formulas, fractions and binomial coefficients, $\sum$ and other large operators, braces and other variable size symbols, aligning equations in a display, and matrices. More special topics include exact sequences and continued fractions.

Exercises sprinkled generously through each chapter encourage the reader to sit down at a terminal and learn through experimentation. Appendixes list summaries of frequently used and more esoteric symbols as well as answers to the exercises.

•*NEW*•
Journal of the American Mathematical Society

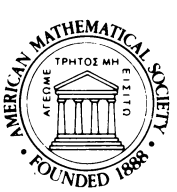
Editors

Michael Artin
H. Blaine Lawson, Jr.
Richard Melrose
Wilfried Schmid
Robert E. Tarjan

The new Journal of the American Mathematical Society began publication with the January 1988 issue. This quarterly journal contains research articles of the highest quality in all areas of pure and applied mathematics. Selected articles appearing in Volume 1 include: *Homology of the zero set of a unipotent vector field on a flag manifold* by C. De Concici, G. Lusztig, and C. Procesi; *Reduced Hausdorff dimension and the concentration-cancellation law for 2-dimensional incompressible flows* by Ronald J. DiPerna and Andrew Majda; *Extremals for the Sobolev inequality on the Heisenberg group and the CR Yamabe problem* by David Jerison and John M. Lee; *p-adic Hodge theory* by G. Faltings; *Flip theorem and the existence of minimal models for 3-folds* by Shigefumi Mori; *Zero-one laws for sparse random matrices* by Saharon Shelah and Joel Spencer; and *Arithmeticity of holonomy groups of Lie foliations* by Robert J. Zimmer

ISSN 0894-0347
Quarterly, Volume 2, 1989

1989 subscription price:
List $111*
Institutional Member $89*
Individual Member $67*
Order code: 89 JAMS/MC



* Add for postage: Surface delivery to destinations outside the U.S. and India — $8; to India — $18; Expedited delivery to destinations in North America — $12; elsewhere — $15.

Note: Subscriptions to AMS journals are sold only on a calender year basis (January–December). Split year and multiple years subscription orders are not accepted. Subscription cancellations from nonmembers will not be accepted after March 1 of the subscription year. Cancellation refunds are computed by deducting an $8 cancellation fee, and the price of each issue already shipped, from the price paid.

TO ORDER: Prepayment required in U.S. funds.
Mail to: American Mathematical Society, Annex Station,
P.O. Box 1571, Providence, Rhode Island, 02901-1571 USA
or call 800-556-7774 in the continental U.S. to use VISA
or MasterCard.

Look what's new in

Mathematical Surveys and Monographs

The Mathematical Surveys and Monographs series is one you're already familiar with. It's been around since 1943, when **The Problem of Moments** by J. A. Shohat and J. D. Tamarkin was published. The series has grown over the years and includes important mathematical monographs that cover a broad spectrum of areas such as function theory, analysis, approximation theory, algebra, and topology. Each of the books is designed to give a survey of the subject and a brief introduction to its recent developments and unsolved problems.

The editorial committee...

Victor W. Guillemin
Irwin Kra
M. Susan Montgomery
R. O. Wells, Jr. (Chairman)

...invites you to participate in the development of this classic series by

- consulting them as reference books
- recommending them to your library to begin a standing order
- using books in this series in your courses
- submitting manuscripts for publication to the Director of Publication at the AMS

New and Recent Publications in Mathematical Surveys and Monographs

Each new title is exceptional. All are the high quality mathematical publications you've grown to expect in the Mathematical Surveys and Monographs series. Yet the variety of topics and areas of mathematical interest make them perfect reference books or possible textbooks for graduate level courses.

❑ **Amenability** by Alan L. T. Paterson, 1988, 416 pp. (ISBN 0-8218-1529-6). List $90, Inst. mem. $72, Indiv. mem. $54, Code SURV/29MC

❑ **Direct and inverse scattering on the line** by Richard Beals, Percy Deift, and Carlos Tomei, 1988, 209 pp. (LC 88-14487; ISBN 0-8218-1530-X). List $53, Inst. mem. $42, Indiv. mem. $32, Code SURV/28MC

❑ **Basic hypergeometric series and applications** by Nathan J. Fine, 1988, 144 pp. (LC 88-6235; ISBN 0-8218-1524-5). List $39, Inst. mem. $31, Indiv. mem. $23, Code SURV/27MC

❑ **Operator theory and arithmetic in H** by Hari Bercovici, 1988, 275 pp. (LC 88-10344; ISBN 0-8218-1528-8). List $67, Inst. mem. $54, Indiv. mem. $40, Code SURV/26MC

❑ **Asymptotic behavior of dissipative systems** by Jack K. Hale, 1988, 198 pp. (LC 87-33495; ISBN 0-8218-1527-X). List $54, Inst. mem. $43, Indiv. mem. $32, Code SURV/25MC

❑ **Noetherian rings and their applications**, edited by Lance W. Small, 1987, 118 pp. (LC 87-14997; ISBN 0-8218-1525-3). List $38, Inst. mem. $30, Indiv. mem. $23, Code SURV/24MC

❑ **Introduction to various aspects of degree theory in Banach spaces** by E. H. Rothe, 1986, 254 pp. (LC 86-8038; ISBN 0-8218-1522-9). List $62, Inst. mem. $50, Indiv. mem. $37, Code SURV/23MC

❑ **Noncommutative harmonic analysis** by Michael E. Taylor, 1986, 344 pp. (LC 86-10924; ISBN 0-8218-1523-7). List $70, Inst. mem. $56, Indiv. mem. $42, Code SURV/22MC

❑ **The Bieberbach conjecture: Proceedings of the symposium on the occasion of the proof**, edited by Albert Baernstein, David Drasin, Peter Duren, and Albert Marden, 1986; reprinted 1987, 260 pp. (LC 86-10843; ISBN 0-8218-1521-0). List $46, Inst. mem. $37, Indiv mem. $28, Code SURV/21MC

❑ **Partially ordered abelian groups with interpolation** by Kenneth R. Goodearl, 1986, 358 pp. (LC 86-7876; ISBN 0-8218-1520-2). List $70, Inst. mem. $56, Indiv. mem. $42, Code SURV/20MC

For information on numbers 1-19, please see the AMS Catalogue of Publications.

Standing orders are accepted for this and any other series published by the Society. Proforma invoices are sent to standing order customers prior to the publication of each new volume. Shipment is made upon receipt of payment and publication. To begin a standing order, please contact the Membership and Sales Department of the AMS.

PREPAYMENT REQUIRED. Order from the American Mathematical Society, P. O. Box 1571, Annex Station, Providence, RI 02901-1571, or call 800-556-7774 from within the continental U. S. (401-272-9500, elsewhere) to use VISA or MasterCard. Prices subject to change. Please add for SHIPPING AND HANDLING: first book $2, each additional $1, $25 maximum. By air, first book $5, each additional $3, $100 maximum.
