Mathematics of Computation

This journal publishes research articles in computational mathematics. Areas covered include numerical analysis, with emphasis on the mathematical analysis and development of methods, computational number theory and algebra, and related fields. Table errata and reviews of books in areas related to computational mathematics are also included.

Submission information. See *Information for Authors* at the end of this issue.

Subscription information. *Mathematics of Computation* is published quarterly. Beginning in January 1996 *Mathematics of Computation* is accessible from e-MATH via the World Wide Web at the URL <http://www.ams.org/publications/>. Subscription prices for Volume 65 (1996) are as follows: for paper delivery, \$290 list, \$232 institutional member, \$261 corporate member, \$189 MAA & SIAM members; \$174 individual member; for electronic delivery, \$261 list, \$209 institutional member, \$235 corporate member, \$170 MAA & SIAM members, \$157 individual member; for combination paper and electronic delivery, \$334 list, \$267 institutional member, \$301 corporate member, \$217 MAA & SIAM members, \$200 individual member. If ordering the paper version, add \$9 for surface delivery outside the United States and India; \$18 to India. Expedited delivery to destinations in North America is \$13; elsewhere \$40.

Back number information. For back issues see the *AMS Catalog of Publications*.

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 5904, Boston, MA 02206-5904. *All orders must be accompanied by payment.* Other correspondence should be addressed to P.O. Box 6248, Providence, RI 02940-6248.

Unpublished Mathematical Tables. The editorial office of the journal maintains a repository of Unpublished Mathematical Tables (UMT). When a table is deposited in the UMT repository a brief summary of its contents is published in the section *Reviews and Descriptions of Tables and Books*. Upon request, the chairman of the editorial committee will supply copies of any table for a nominal cost per page. All tables and correspondence concerning the UMT should be sent to Lars B. Wahlbin, Chairman, Editorial Committee, Mathematics of Computation, Center for Applied Mathematics, 657 Frank H. T. Rhodes Hall, Cornell University, Ithaca, NY 14853.

Copying and reprinting. Material in this journal may be reproduced by any means for educational and scientific purposes without fee or permission with the exception of reproduction by services that collect fees for delivery of documents and provided that the customary acknowledgment of the source is given. This consent does not extend to other kinds of copying for general distribution, for advertising or promotional purposes, or for resale. Requests for permission for commercial use of material should be addressed to the Assistant to the Publisher, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. Requests can also be made by e-mail to reprint-permission@ams.org.

Excluded from these provisions is material in articles for which the author holds copyright. In such cases, requests for permission to use or reprint should be addressed directly to the author(s). (Copyright ownership is indicated in the notice in the lower right-hand corner of the first page of each article.)

Mathematics of Computation is published quarterly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2213. Periodicals postage is paid at Providence, Rhode Island. Postmaster: Send address changes to Mathematics of Computation, American Mathematical Society, P. O. Box 6248, Providence, RI 02940-6248.

This journal is indexed in *Science Citation Index®*, *SciSearch®*,
Research Alert®, *CompuMath Citation Index®*, and
Current Contents®/Physical, Chemical & Earth Sciences.

⊗ The paper used in this book is acid-free and falls within the guidelines established to ensure permanence and durability.

INDEX TO VOLUME 65 (1996)

- Acciaro, Vincenzo. *Solvability of norm equations over cyclic number fields of prime degree*, 1663
Anglin, W. S. *Simultaneous Pell equations*, 355
Bach, Eric, Lukes, Richard, Shallit, Jeffrey, and Williams, H. C. *Results and estimates on pseudopowers*, 1737
Bach, Eric, and Peralta, René. *Asymptotic semismoothness probabilities*, 1701
Bach, Eric, and Sorenson, Jonathan. *Explicit bounds for primes in residue classes*, 1717
Bhatia, Rajendra, and Li, Ren-Cang. *On perturbations of matrix pencils with real spectra. II*, 637
de Boor, Carl. *On the Sauer-Xu formula for the error in multivariate polynomial interpolation*, 1231
Borwein, Peter, and Erdélyi, Tamás. *The integer Chebyshev problem*, 661
Bosma, Wieb, and Stevenhagen, Peter. *Density computations for real quadratic units*, 1327
Bouchut, F., Bourdarias, Ch., and Perthame, B. *A MUSCL method satisfying all the numerical entropy inequalities*, 1439
Bourdarias, Ch. *See* Bouchut, F.
Boyd, David W. *On beta expansions for Pisot numbers*, 841
_____. *On the beta expansion for Salem numbers of degree 6*, 861
Brenner, Susanne C. *Two-level additive Schwarz preconditioners for nonconforming finite element methods*, 897
Brezina, Marian. *See* Mandel, Jan
Brown, Brienne E., and Gordon, Daniel M. *On sequences without geometric progressions*, 1749
Buchmann, Johannes, and Shoup, Victor. *Constructing nonresidues in finite fields and the extended Riemann hypothesis*, 1311
Burthe, Ronald Joseph, Jr. *Further investigations with the strong probable prime test*, 373
Call, Gregory S., and Silverman, Joseph H. *Computing the canonical height on K3 surfaces*, 259
Carstensen, Carsten. *Efficiency of a posteriori BEM-error estimates for first-kind integral equations on quasi-uniform meshes*, 69
Cheer, A. Y., and Goldston, D. A. *Turán's pure power sum problem*, 1349
Chen, Goong. *See* Deng, Yuanhua
Chen, Zhangxin, Ewing, Richard E., and Lazarov, Raytcho. *Domain decomposition algorithms for mixed methods for second-order elliptic problems*, 467
Chui, Charles K., and De Villiers, Johan M. *Applications of optimally local interpolation to interpolatory approximants and compactly supported wavelets*, 99
Chui, Charles K., and Hong, Dong. *Construction of local C^1 quartic spline elements for optimal-order approximation*, 85
Clark, David A. *Non-Galois cubic fields which are Euclidean but not norm-Euclidean*, 1675
Cockburn, Bernardo, and Gremaud, Pierre-Alain. *A priori error estimates for numerical methods for scalar conservation laws. Part I: The general approach*, 533
Cohen, Henri. *Hermite and Smith normal form algorithms over Dedekind domains*, 1681
Cohn, Harvey, and McKay, John. *Spontaneous generation of modular invariants*, 1295
Cools, Ronald, and Sloan, Ian H. *Minimal cubature formulae of trigonometric degree*, 1583
Coutsias, Evangelos A., Hagstrom, Thomas, and Torres, David. *An efficient spectral method for ordinary differential equations with rational function coefficients*, 611
Couture, Raymond, and L'Ecuyer, Pierre. *Orbits and lattices for linear random number generators with composite moduli*, 189
Daberkow, M., and Pohst, M. *On integral bases in relative quadratic extensions*, 319
Deleglise, M., and Rivat, J. *Computing $\pi(x)$: the Meissel, Lehmer, Lagarias, Miller, Odlyzko method*, 235
Demichelis, V. *Quasi-interpolatory splines based on Schoenberg points*, 1235
Deng, Yuanhua, Chen, Goong, Ni, Wei-Ming, and Zhou, Jianxin. *Boundary element monotone iteration scheme for semilinear elliptic partial differential equations*, 943
De Villiers, Johan M. *See* Chui, Charles K.
Dimitrov, Dimitar K. *Integration of polyharmonic functions*, 1269
Doman, B. G. S. *An asymptotic expansion for the incomplete beta function*, 1283
Dubner, Harvey. *Large Sophie Germain primes*, 393
Duijvestijn, A. J. W. *The number of polyhedral (3-connected planar) graphs*, 1289
_____. *Simple perfect squared squares and 2×1 squared rectangles of order 26*, 1359

INDEX TO VOLUME 65 (1996)

- Eichenauer-Herrmann, Jürgen, and Emmerich, Frank. *Compound inversive congruential pseudorandom numbers: an average-case analysis*, 215
- Ekl, Randy L. *Equal sums of four seventh powers*, 1755
- Emmerich, Frank. *See* Eichenauer-Herrmann, Jürgen
 _____. *Pseudorandom vector generation by the compound inversive method*, 749

INDEX OF REVIEWS BY SUBJECT OF WORK REVIEWED

<i>Author</i>	<i>Review Number</i>	<i>Title</i>	<i>Page</i>
00-XX General			
00A20 <i>Dictionaries and other general reference works</i>			
ABELL, MARTHA L., & BRASELTON, JAMES P.	46	The Maple V handbook	1764
00A69 <i>General applied mathematics</i>			
FRIEDMAN, AVNER, & LITTMAN, WALTER	15	Industrial mathematics: A course in solving real-world problems	878
01-XX History and biography			
01A70 <i>Biographies, obituaries, personalia, bibliographies</i>			
BROWN, J. DAVID, CHU, MOODY T., ELLISON, DONALD C., & PLEMMONS, ROBERT J. (EDITORS)	6	Proceedings of the Cornelius Lanczos international centenary conference	432
ZAHAR, R. V. M. (EDITOR)	35	Approximation and computation: A festschrift in honor of Walter Gautschi	1372
11-XX Number theory			
11-00 <i>General reference works</i>			
SLOANE, N. J. A., & PLOUFEE, SIMON	28	The encyclopedia of integer sequences	894
11-01 <i>Instructional exposition</i>			
COHEN, HENRI	13	A course in computational algebraic number theory	440

INDEX OF REVIEWS BY SUBJECT OF WORK REVIEWED

11-02	<i>Research exposition</i>		
RIESEL, HANS	37	Prime numbers and computer methods for factorization	1377
STEPANOV, SERGUEI A.	47	Arithmetic of algebraic curves	1767
11B83	<i>Special sequences and polynomials</i>		
SLOANE, N. J. A., & PLOUFEE, SIMON	28	The encyclopedia of integer sequences	894
11Gxx	<i>Arithmetic algebraic geometry</i>		
STEPANOV, SERGUEI A.	47	Arithmetic of algebraic curves	1767
11Txx	<i>Finite fields and commutative rings</i>		
LIDL, RUDOLF, & NIEDERREITER, HARALD	36	Introduction to finite fields and their applications	1376
11Yxx	<i>Computational number theory</i>		
COHEN, HENRI	13	A course in computational algebraic number theory	440
11Y05	<i>Factorization</i>		
RIESEL, HANS	37	Prime numbers and computer methods for factorization	1377
11Y11	<i>Primality</i>		
RIESEL, HANS	37	Prime numbers and computer methods for factorization	1377
11Y16	<i>Algorithms; complexity</i>		
RIESEL, HANS	37	Prime numbers and computer methods for factorization	1377
11Y35	<i>Analytic computations</i>		
RIESEL, HANS	37	Prime numbers and computer methods for factorization	1377
11Y40	<i>Algebraic number theory computations</i>		
RIESEL, HANS	37	Prime numbers and computer methods for factorization	1377
12-XX	Field theory and polynomials		
12Y05	<i>Computational aspects of field theory and polynomials</i>		
KRISHNA, HARI, KRISHNA, BAL, LIN, KUO-YU, & SUN, JENN-DONG	27	Computational number theory and digital signal processing: Fast algorithms and error control techniques	893
15-XX	Linear and multilinear algebra; matrix theory		
15A06	<i>Linear equations</i>		
BINI, DARIO, & PAN, VICTOR Y.	22	Polynomial and matrix computations: Fundamental algorithms, Vol. 1	888
26-XX	Real functions		
26C05	<i>Polynomials: analytic properties, etc.</i>		
MILOVANOVIĆ, G. V., MITRINOVICIĆ, D. S., & RASSIAS, TH. M.	10	Topics in polynomials: extremal problems, inequalities, zeros	438

INDEX OF REVIEWS BY SUBJECT OF WORK REVIEWED

26C10 <i>Polynomials: location of zeros</i>			
MILOVANOVIĆ, G. V., MITRINOVIĆ, D. S., & RASSIAS, TH. M.	10	Topics in polynomials: extremal problems, inequalities, zeros	438
26Dxx Inequalities			
MILOVANOVIĆ, G. V., MITRINOVIĆ, D. S., & RASSIAS, TH. M.	10	Topics in polynomials: extremal problems, inequalities, zeros	438
33-XX Special functions			
ZAHAR, R. V. M. (EDITOR)	35	Approximation and computation: A festschrift in honor of Walter Gautschi	1372
33C45 Orthogonal polynomials and functions			
ZAHAR, R. V. M. (EDITOR)	35	Approximation and computation: A festschrift in honor of Walter Gautschi	1372
34-XX Ordinary differential equations			
34-01 <i>Instructional exposition</i>			
COOMBES, KEVIN R., HUNT, BRIAN R., LIPSMAN, RONALD L., OSBORN, JOHN E., & STUCK, GARRETT J.	32	Differential equations with Mathematica	1369
FRIEDMAN, AVNER, & LITTMAN, WALTER	15	Industrial mathematics: A course in solving real-world problems	878
34-04 <i>Explicit machine computation and programs</i>			
COOMBES, KEVIN R., HUNT, BRIAN R., LIPSMAN, RONALD L., OSBORN, JOHN E., & STUCK, GARRETT J.	32	Differential equations with Mathematica	1369
34E15 <i>Singular perturbations, general theory</i>			
VASIL'eva, ADELAIDA B., BUTUZOV, VALENTIN F., & KALACHEV, LEONID V.	30	The boundary function method for singular perturbation problems	1366
35-XX Partial differential equations			
35-01 <i>Instructional exposition</i>			
FRIEDMAN, AVNER, & LITTMAN, WALTER	15	Industrial mathematics: A course in solving real-world problems	878
35B25 <i>Singular perturbations</i>			
VASIL'eva, ADELAIDA B., BUTUZOV, VALENTIN F., & KALACHEV, LEONID V.	30	The boundary function method for singular perturbation problems	1366
35L05 <i>Wave equation</i>			
COHEN, GARY (EDITOR)	31	Mathematical and numerical aspects of wave propagation	1369
39-XX Finite differences and functional equations			
39A05 <i>General</i>			
BRIGGS, WILLIAM L., & HENSON, VAN EMDEN	33	The DFT: An owner's manual for the discrete Fourier transform	1371

INDEX OF REVIEWS BY SUBJECT OF WORK REVIEWED

41-XX Approximations and expansions

ZAHAR, R. V. M. (EDITOR)	35	Approximation and computation: A festschrift in honor of Walter Gautschi	1372
41-00 <i>General reference works</i>			
CIARLET, P. G., & LIONS, J. L. (EDITORS)	1	Handbook of numerical analysis	429
SHIKIN, EUGENE V., & PLIS, ALEXANDER I.	41	Handbook on splines for the user	1760
41-02 <i>Research exposition</i>			
MILOVANOVIĆ, G. V., MITRINOVIĆ, D. S., & RASSIAS, TH. M.	10	Topics in polynomials: extremal problems, inequalities, zeros	438
41-04 <i>Explicit machine computation and programs</i>			
SHIKIN, EUGENE V., & PLIS, ALEXANDER I.	41	Handbook on splines for the user	1760
WICKERHAUSER, MLADEN VICTOR	8	Adapted wavelet analysis from theory to software	436
41-06 <i>Proceedings, conferences, collections, etc.</i>			
CHUI, CHARLES K., MONTEFUSCO, LAURA, & PUCCIO, LUIGIA (EDITORS)	24	Wavelets: theory, algorithms, and applications	890
DIKSHIT, H. P., & MICCHELLI, C. A. (EDITORS)	5	Advances in computational mathematics: New Delhi, India	432
LAURENT, PIERRE-JEAN, LE MÉHAUTÉ, ALAIN, & SCHUMAKER, LARRY L. (EDITORS)	7	Curves and surfaces in geometric design	435
41A05 <i>Interpolation</i>			
CIARLET, P. G., & LIONS, J. L. (EDITORS)	1	Handbook of numerical analysis	429
41A15 <i>Spline approximation</i>			
LAURENT, PIERRE-JEAN, LE MÉHAUTÉ, ALAIN, & SCHUMAKER, LARRY L. (EDITORS)	7	Curves and surfaces in geometric design	435
SHIKIN, EUGENE V., & PLIS, ALEXANDER I.	41	Handbook on splines for the user	1760
41A17 <i>Inequalities in approximation</i>			
MILOVANOVIĆ, G. V., MITRINOVIĆ, D. S., & RASSIAS, TH. M.	10	Topics in polynomials: extremal problems, inequalities, zeros	438
41A21 <i>Padé approximation</i>			
CIARLET, P. G., & LIONS, J. L. (EDITORS)	1	Handbook of numerical analysis	429
41A30 <i>Approximation by other special function classes</i>			
CHUI, CHARLES K., MONTEFUSCO, LAURA, & PUCCIO, LUIGIA (EDITORS)	24	Wavelets: theory, algorithms, and applications	890

INDEX OF REVIEWS BY SUBJECT OF WORK REVIEWED

WICKERHAUSER, MLADEN VICTOR	8	<i>Adapted wavelet analysis from theory to software</i>	436
41A55 <i>Approximate quadratures</i>			
CIARLET, P. G., & LIONS, J. L. (EDITORS)	1	<i>Handbook of numerical analysis</i>	429
ZAHAR, R. V. M. (EDITOR)	35	<i>Approximation and computation: A festschrift in honor of Walter Gautschi</i>	1372

Mathematics of Computation

This journal publishes research articles in computational mathematics. Areas covered include numerical analysis, with emphasis on the mathematical analysis and development of methods, computational number theory and algebra, and related fields. Table errata and reviews of books in areas related to computational mathematics are also included.

Submission information. See *Information for Authors* at the end of this issue.

Subscription information. *Mathematics of Computation* is published quarterly. Beginning in January 1996 *Mathematics of Computation* is accessible from e-MATH via the World Wide Web at the URL <http://www.ams.org/publications/>. Subscription prices for Volume 65 (1996) are as follows: for paper delivery, \$290 list, \$232 institutional member, \$261 corporate member, \$189 MAA & SIAM members; \$174 individual member; for electronic delivery, \$261 list, \$209 institutional member, \$235 corporate member, \$170 MAA & SIAM members, \$157 individual member; for combination paper and electronic delivery, \$334 list, \$267 institutional member, \$301 corporate member, \$217 MAA & SIAM members, \$200 individual member. If ordering the paper version, add \$9 for surface delivery outside the United States and India; \$18 to India. Expedited delivery to destinations in North America is \$13; elsewhere \$40.

Back number information. For back issues see the *AMS Catalog of Publications*.

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 5904, Boston, MA 02206-5904. *All orders must be accompanied by payment.* Other correspondence should be addressed to P.O. Box 6248, Providence, RI 02940-6248.

Unpublished Mathematical Tables. The editorial office of the journal maintains a repository of Unpublished Mathematical Tables (UMT). When a table is deposited in the UMT repository a brief summary of its contents is published in the section *Reviews and Descriptions of Tables and Books*. Upon request, the chairman of the editorial committee will supply copies of any table for a nominal cost per page. All tables and correspondence concerning the UMT should be sent to Lars B. Wahlbin, Chairman, Editorial Committee, Mathematics of Computation, Center for Applied Mathematics, 657 Frank H. T. Rhodes Hall, Cornell University, Ithaca, NY 14853.

Copying and reprinting. Material in this journal may be reproduced by any means for educational and scientific purposes without fee or permission with the exception of reproduction by services that collect fees for delivery of documents and provided that the customary acknowledgment of the source is given. This consent does not extend to other kinds of copying for general distribution, for advertising or promotional purposes, or for resale. Requests for permission for commercial use of material should be addressed to the Assistant to the Publisher, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. Requests can also be made by e-mail to reprint-permission@ams.org.

Excluded from these provisions is material in articles for which the author holds copyright. In such cases, requests for permission to use or reprint should be addressed directly to the author(s). (Copyright ownership is indicated in the notice in the lower right-hand corner of the first page of each article.)

Mathematics of Computation is published quarterly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2213. Periodicals postage is paid at Providence, Rhode Island. Postmaster: Send address changes to Mathematics of Computation, American Mathematical Society, P. O. Box 6248, Providence, RI 02940-6248.

CONTENTS

Vol. 65, No. 213

January 1996

Ch. Lubich, I. H. Sloan, and V. Thomée, Nonsmooth data error estimates for approximations of an evolution equation with a positive-type memory term	1
Alfred H. Schatz and Junping Wang, Some new error estimates for Ritz-Galerkin methods with minimal regularity assumptions	19
R. A. Nicolaides and X. Wu, Analysis and convergence of the MAC scheme. II. Navier-Stokes equations	29
Huanan Yang, On wavewise entropy inequalities for high-resolution schemes. I: The semidiscrete case	45
Carsten Carstensen, Efficiency of a posteriori BEM-error estimates for first-kind integral equations on quasi-uniform meshes	69
Charles K. Chui and Dong Hong, Construction of local C^1 quartic spline elements for optimal-order approximation	85
Charles K. Chui and Johan M. De Villiers, Applications of optimally local interpolation to interpolatory approximants and compactly supported wavelets	99
Urs von Matt and G. W. Stewart, Rounding errors in solving block Hessenberg systems	115
V. V. Strela and E. E. Tyrtyshnikov, Which circulant preconditioner is better?	137
Arno B. J. Kuijlaars, The zeros of Faber polynomials generated by an m -star	151
David M. Smith, A multiple-precision division algorithm	157
J. N. Lyness and S. Joe, Triangular canonical forms for lattice rules of prime-power order	165
Christian Lécot, Error bounds for quasi-Monte Carlo integration with nets	179
Raymond Couture and Pierre L'Ecuyer, Orbits and lattices for linear random number generators with composite moduli	189
Pierre L'Ecuyer, Maximally equidistributed combined Tausworthe generators	203
Jürgen Eichenauer-Herrmann and Frank Emmerich, Compound inversive congruential pseudorandom numbers: an average-case analysis	215
Takashi Kato, Li-Ming Wu, and Niro Yanagihara, On a nonlinear congruential pseudorandom number generator	227
M. Deleglise and J. Rivat, Computing $\pi(x)$: the Meissel, Lehmer, Lagarias, Miller, Odlyzko method	235
Tohsuke Urabe, Calculation of Manin's invariant for Del Pezzo surfaces ..	247
Gregory S. Call and Joseph H. Silverman, Computing the canonical height on K3 surfaces	259
Kimberly Pearson, Integral cohomology and detection of w -basic 2-groups	291
V. Flammang, Two new points in the spectrum of the absolute Mahler measure of totally positive algebraic integers	307

T. Fukuda and K. Komatsu, A capitulation problem and Greenberg's conjecture on real quadratic fields	313
M. Daberkow and M. Pohst, On integral bases in relative quadratic extensions	319
Wen Bao Han, The coefficients of primitive polynomials over finite fields .	331
Maurice Mignotte, Attila Pethö, and Ralf Roth, Complete solutions of a family of quartic Thue and index form equations	341
W. S. Anglin, Simultaneous Pell equations	355
R. F. Lukes, C. D. Patterson, and H. C. Williams, Some results on pseudosquares	361
Ronald Joseph Burthe, Jr., Further investigations with the strong probable prime test	373
Samuel S. Wagstaff, Jr., Aurifeuillian factorizations and the period of the Bell numbers modulo a prime	383
Harvey Dubner, Large Sophie Germain primes	393
Olivier Ramaré and Robert Rumely, Primes in arithmetic progressions	397
Karl-Heinz Indlekofer and Antal Járai, Largest known twin primes ..	427
Reviews and Descriptions of Tables and Books	429
Ciarlet and Lions, Editors 1, Lions and Baiocchi, Editors 2, Banks, Editor 3, Cox 4, Dikshit and Micchelli, Editors 5, Brown, Chu, Ellison, and Plemmons, Editors 6, Laurent, le Méhauté, and Schumaker, Editors 7, Wickenhauser 8, Foufoula-Georgiou and Kumar, Editors 9, Milovanović, Mitrinović, and Rassias 10, Rubio 11, Bailey, Bjørstad, Gilbert, Mascagni, Schreiber, Simon, Torczon, and Watson, Editors 12, Cohen 13	
Corrigendum	445
Supplement to "On wavewise entropy inequalities for high-resolution schemes. I: The semidiscrete case" by Huanan Yang	S1
Supplement to "Calculation of Manin's invariant for Del Pezzo surfaces" by Tohsuke Urabe	S15
Supplement to "Some results on pseudosquares" by R. F. Lukes, C. D. Patterson, and H. C. Williams	S25

Editorial Information

As of June 30, 1996, the backlog for this journal was approximately 0 issues. This estimate is the result of dividing the number of manuscripts for this journal in the Providence office that have not yet gone to the printer on the above date by the average number of articles per issue over the previous twelve months, reduced by the number of issues published in six months (the time necessary for editing and composing a typical issue).

A Consent to Publish and Copyright Agreement is required before a paper will be published in this journal. By submitting a paper to this journal, authors certify that the results have not been submitted to nor are they under consideration for publication by another journal, conference proceedings, or similar publication.

Information for Authors

Initial submission. An author should submit three paper copies of the manuscript. Initial submission by e-mail is not allowed. The author may suggest an appropriate editor for his paper. All contributions intended for publication and all books for review should be addressed to Lars B. Wahlbin, Managing Editor, Mathematics of Computation, Center for Applied Mathematics, 657 Frank H. T. Rhodes Hall, Cornell University, Ithaca, NY 14853-3801. The date received, which is published with the final version of an accepted paper, is the date received in the office of the Managing Editor, and it is the responsibility of the author to submit manuscripts directly to this office.

The first page must consist of a *descriptive title*, followed by an *abstract* that summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short, but informative; useless or vague phrases such as “some remarks about” or “concerning” should be avoided. The *abstract* must be brief and reasonably self-contained. Included with the footnotes to the paper, there should be the 1991 *Mathematics Subject Classification* representing the primary and secondary subjects of the article. This may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. A list of classifications may be found in the annual index of *Mathematical Reviews*, published with the December issue starting in 1990. Journal abbreviations used in bibliographies are also listed in the latest *Mathematical Reviews* annual index. The classifications and the journal abbreviations are accessible from e-MATH via the World Wide Web through the URL <http://www.ams.org/committee/publications/mr-info.html> or via FTP to e-math.ams.org (login as **anonymous** and enter username as password). The classifications are available as a browsable list and the journal abbreviations are available through a search tool. When the manuscript is submitted, authors should supply the editor with electronic addresses if available. These will be printed after the postal address at the end of each article.

Electronically prepared manuscripts. For the final submission of accepted papers, the AMS encourages use of electronically prepared manuscripts, with a strong preference for *AMS-L^AT_EX* submissions. To this end, the Society has prepared *AMS-L^AT_EX* author packages for each AMS publication. Author packages include instructions for preparing electronic manuscripts, the *AMS Author Handbook*, samples, and a style file that generates the particular design specifications of that publication series. Articles properly prepared using the *AMS-L^AT_EX* style file automatically provide hypertext linking to the bibliography and other elements of the article for searching electronically on the World Wide Web. Because linking must often be added manually to submissions in other forms of *T_EX*, using *AMS-L^AT_EX* also reduces the amount of technical intervention once the files are received by the AMS. This results in fewer errors in processing and saves the author proofreading time. *AMS-L^AT_EX* papers also move more efficiently through the production stream, helping to minimize publishing costs.

AMS-L^AT_EX is the highly preferred format of *T_EX*, but author packages are also available in *AMS-T_EX*. Those authors who make use of these style files from the beginning of the writing process will further reduce their own efforts. Electronically submitted manuscripts prepared in *L^AT_EX* or plain *T_EX* are normally not acceptable due to the high amount of

technical time required to insure that the file will run properly through the AMS in-house production system. L^AT_EX users will find that A_MS-L^AT_EX is the same as L^AT_EX with additional commands to simplify the typesetting of mathematics, and users of plain T_EX should have little difficulty learning A_MS-T_EX.

Authors may retrieve an author package from e-MATH via the World Wide Web through the URL <http://www.ams.org/tex/> or via FTP to [e-math.ams.org](ftp://e-math.ams.org) (login as **anonymous** and enter username as password). The author package can also be obtained free of charge by sending e-mail to pub@ams.org (Internet) or from the Publication Division, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. When requesting an author package, please specify A_MS-L^AT_EX or A_MS-T_EX, Macintosh or IBM (3.5) format, and the publication in which your paper will appear. Please be sure to include your complete mailing address.

The final version of the electronic manuscript should be sent to the Providence office immediately after the paper has been accepted for publication. The author should also send the final version of the paper manuscript to the Managing Editor, who will forward a copy to the Providence office. Editors will require authors to send their electronically prepared manuscripts to the Providence office in a timely fashion. Electronically prepared manuscripts can be sent via e-mail to pub-submit@ams.org (Internet) or on diskette to the Electronic Prepress Department, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. When submitting an electronic manuscript, please be sure to include a message indicating in which publication the paper has been accepted. No corrections will be accepted electronically. Authors must mark their changes on their proof copies and return them to the Providence office. Complete instructions on how to submit files are included in the author package.

Electronic graphics. Figures may be submitted to the AMS in an electronic format. The AMS recommends that graphics created electronically be saved in Encapsulated Post-Script (EPS) format. This includes graphics originated via a graphics application as well as scanned photographs or other computer-generated images.

If the graphics package used does not support EPS output, the graphics file should be saved in one of the standard graphics formats—such as TIFF, PICT, GIF, etc.—rather than in an application-dependent format. Graphics files submitted in an application-dependent format are not likely to be used. No matter what method was used to produce the graphic, it is necessary to provide a paper copy to the AMS.

Authors using graphics packages for the creation of electronic art should also avoid the use of any lines thinner than 0.5 points in width. Many graphics packages allow the user to specify a “hairline” for a very thin line. Hairlines often look acceptable when proofed on a typical laser printer. However, when produced on a high-resolution laser imagesetter, hairlines become nearly invisible and will be lost entirely in the final printing process.

Screens should be set to values between 15% and 85%. Screens which fall outside of this range are too light or too dark to print correctly.

T_EX files available. Beginning with the January 1992 issue of the *Bulletin* and the January 1996 issues of *Transactions*, *Proceedings*, *Mathematics of Computation*, and the *Journal of the AMS*, T_EX files can be downloaded from e-MATH, starting from URL <http://www.ams.org/journals/>. Authors without Web access may request their files at the address given below after the article has been published. For *Bulletin* papers published in 1987 through 1991 and for *Transactions*, *Proceedings*, *Mathematics of Computation*, and the *Journal of the AMS* papers published in 1987 through 1995, T_EX files are available upon request for authors without Web access by sending e-mail to file-request@ams.org or by contacting the Electronic Prepress Department, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. The request should include the title of the paper, the name(s) of the author(s), the name of the publication in which the paper has or will appear, and the volume and issue numbers if known. The T_EX file will be sent to the author making the request after the article goes to the printer. If the requestor can receive Internet e-mail, please include the e-mail address to which the file should be sent. Otherwise please indicate a diskette format and postal address to which a disk

should be mailed. **Note:** Because TeX production at the AMS sometimes requires extra fonts and macros that are not yet publicly available, TeX files cannot be guaranteed to run through the author's version of TeX without errors. The AMS regrets that it cannot provide support to eliminate such errors in the author's TeX environment.

Any inquiries concerning a paper that has been accepted for publication should be sent directly to the Electronic Prepress Department, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248.
