998-16-197 Gary F. Birkenmeier* (gfb1127@louisiana.edu), Jae Keol Park (jkpark@pusan.ac.kr) and S.Tariq Rizvi (rizvi.1@osu.edu). Module Hulls.Preliminary report.

In this talk we discuss various concepts of the hull of a module, where the hull is from a certain class of modules. Existence or uniqueness results on hulls from various classes (including extending, FI-extending, continuous, etc.) are presented. Examples are provided to illustrate the theory.
