

**Meeting:** 998, Houston, Texas, SS 12A, Special Session on Problems and Issues in Electronic Publishing

998-00-231            **Enrique Ramírez de Arellano\*** (eramirez@math.cinvestav.mx), Av. Instituto Politecnico Nacional 2508, Col. San Pedro Zacatenco, 07360 Mexico City, Mexico, Mexico. *Electronic publishing for the Boletín de la Sociedad Matemática Mexicana?*

Many questions occur to this managing editor regarding the prospect of electronic publishing. Although electronic communications have been well incorporated into our editorial process for many years, a set of consistent solutions must be found for the following: original web program vs using existing online publisher; what (if anything) to charge, access policy in general; quality (appropriate formats, resolution) of electronic documents; implications for authors; policy regarding paper archives; publicity or other means of increasing readership; measurement of results; transition period to becoming a full electronic journal.
