

THE AMERICAN MATHEMATICAL SOCIETY,  
THE MATHEMATICAL SCIENCES RESEARCH INSTITUTE  
AND SAN FRANCISCO STATE UNIVERSITY

P R E S E N T

*The AMS Einstein Public Lecture  
in Mathematics*

# BENOÎT B. MANDELBROT

Sterling Professor of  
Mathematical Sciences, Yale University  
and IBM Fellow Emeritus

*The AMS Einstein  
Public Lecture  
in Mathematics*

*The Nature of Roughness  
in Mathematics, Science,  
and Art*

Saturday, April 29

8:00 p.m.

Jack Adams Hall

Cesar Chavez Student  
Center

San Francisco State  
University

This event is part of the AMS  
2006 Spring Sectional meeting  
at SFSU, April 29–30, 2006.

*Sponsored by the American Mathematical Society  
and MSRI at Berkeley. Hosted by the Department  
of Mathematics, San Francisco State University.  
See [www.ams.org/meetings/einstein-lect.html](http://www.ams.org/meetings/einstein-lect.html)*

Professor Mandelbrot is world famous for his work on fractal geometry and chaos theory. He is universally acknowledged as the “father of fractals”, a subject that has its roots in the work of Weierstrass, Cantor, Klein, and Poincaré. Professor Mandelbrot has proposed fractal models for the study of coastlines, clouds, lungs, trees, arteries, etc. In a special issue of “Le Nouvel Observateur”, published a few years ago, he was listed as one of the ten most influential scientists of our time.

For his fundamental discoveries, Professor Mandelbrot has been awarded numerous prizes and honors, including the 1994 Wolf Prize for Physics.

He is a foreign member of the U.S. National Academy of Sciences, a fellow of the Academy of Arts and Sciences, and a member of the European Academy of Arts, Sciences and Humanities, among other academies.
