

Meeting: 1001, Evanston, Illinois, SS 17A, Special Session on Geometric Aspects of the Langlands Program

1001-17-73 **David Kazhdan*** (kazhdan@math.huji.ac.il), Math.,Dep, Hebrew University, Jerusalem, Israel. *On the stability of invariant distributions over local fields.*

I will talk about two aspects of the stability: a description of the endoscopic decomposition of invariant distributions concentrated on the nilpotent cone and the endoscopic decomposition of characters of the depth zero. (Received August 09, 2004)
