Robert Guralnick (guralnic@usc.edu) and **John Shareshian*** (shareshi@math.wustl.edu),
One Brookings Drive, Cupples I, Campus Box 1146, St. Louis, MO 63130. *Branched coverings of
the sphere and Galois groups of trinomials.*

Using a result of N. Elkies, we show that most permutation groups cannot be the Galois group of infinitely many trinomials
(up to a natural equivalence relation) over a number field. (Received February 22, 2005)
