John K. Beem* (beem@math.missouri.edu), Mathematics Department, University of Missouri-Columbia, Columbia, MO 65211. *Geometry for Middle School Mathematics Teachers*. Preliminary report.

Improving the mathematics education of middle school students is of great importance. Thus, the mathematics education of future middle school mathematics teachers must be given a high priority. Geometry is one of the key topics that middle school mathematics teachers must be well prepared to deal with in the classroom. This session will discuss materials for a course in geometry for future middle school mathematics teachers. (Received August 26, 2005)
