**Jill C Pipher\*** (jpipher@math.brown.edu), Mathematics Department, Box 1917, Brown University, Providence, RI 02912, and **Lesley Ward**. *BMO from dyadic BMO on the bidisc.*

A theorem of Garnett and Jones relating  $BMO$  to its martingale counterpart, dyadic  $BMO$ , can be generalized to the product setting. As a corollary, this gives a multiparameter version of a theorem of Burgess Davis connecting the Hardy space  $H^1$  to martingale  $H^1$ . (Received February 08, 2006)
