**Sung Ha Kang\*** ([skang@ms.uky.edu](mailto:skang@ms.uky.edu)), 715 Patterson Office Tower, University of Kentucky,  
Lexington, KY 40506. *Image and Video dejittering.*

Video jittering occurs when the horizontal lines of video image frames are randomly displaced due to the corruption of synchronization signals or electromagnetic interference during video transmission. Couple of approaches using variational/PDe methods will be presented. (Received February 07, 2006)
