P Bhattacharyya* (bhattacharya_p@yahoo.com), New no 5, old no 18, Dr. Vasudave Nagar Extension, Thiruvanmiyur, 600041 Chennai, Tamilnadu, India. *Current state of mathematics education in India*. Preliminary report.

India has a strong tradition of mathematics from the olden days. But in the present days contributions of Indian mathematicians from India seem to be very poor. In this paper we make an attempt to analyse this situation and suggest some remedies. The topic may be of interest to mathematics educators in USA since USA hires a large number of mathematics teachers from India. (Received July 05, 2005)
