**Hsian-Hua Tseng\***, 1984 Mathematics Road, Vancouver, BC V6T 1Z2, Canada. *Gromov-Witten theory of twisted projective lines and integrable hierarchies.*

We will discuss the recent results on the connection between orbifold Gromov-Witten theory of  $P^1$  with two cyclic stacky points and integrable hierarchies. This is a joint work with T. Milanov. (Received July 21, 2006)
