Emil J. Straube* (straube@math.tamu.edu), Department of Mathematics, Texas A&M University, College Station, TX 77843. *Some questions concerning regularity properties of $\bar{\partial}$ and $\bar{\partial}_b$.* Preliminary report.

I will discuss several questions in the regularity theory of $\bar{\partial}$ and $\bar{\partial}_b$, including compactness and hypoellipticity in *local* L^2 spaces, subellipticity and plurisubharmonic functions, regularity properties and Stein neighborhood bases of the closure.
