John Rossi* (rossi@math.vt.edu), Department of Mathematics, Virginia Tech, Blacksburg, VA 24061-0123, and **P C Fenton**. *A Reverse Denjoy Theorem*. Preliminary report.

Let u be a subharmonic function in the plane with maximum modulus $B(r)$. Suppose that u grows asymptotically to $B(r)$ on two curves C_1 and C_2 receding to infinity with angular opening at most α . If u is bounded on a curve in the region bounded by the C_i , then the order of u is at least π/α . (Received December 22, 2006)
