**M. D Iftime\*** ([miftime@bu.edu](mailto:miftime@bu.edu)), 179 Longwood Ave, Boston, MA 02115. *A framework for classical and quantum geometries*. Preliminary report.

Several geometric structures can be derived from a Lorentzian 4-metric: conformal, projective, affine and Weyl structure. I hope to use these mathematical relations and techniques from differential and information geometry to develop a framework for classical and quantum 4-geometries. (Received December 26, 2007)
