Christopher Dwyer* (dwyer@math.binghamton.edu), Department of Mathematical Sciences, Binghamton University, Binghamton, NY 13902-6000, and **Nansen Petrosyan** (Nansen.Petrosyan@kuleuven-kortrijk.be). *Notes on an additive decomposition for twisted equivariant K-theory*. Preliminary report.

I will discuss a decomposition of twisted K-theory in the case of a discrete group acting properly. This is work in progress in proving a conjecture by Alejandro Adem and Yongbin Ruan for twisted orbifold K-theory. (Received January 21, 2008)
