**Elena Prestini\*** ([prestini@mat.uniroma2.it](mailto:prestini@mat.uniroma2.it)), Dipartimento di Matematica, Università di Roma "Tor Vergata", Via della Ricerca Scientifica n.1, Roma 00133, Italy, and **Leonardo Colzani** and **Chris Meaney**. *Almost everywhere convergence of inverse Fourier transforms.*

I will present 1) a simple and quite general proof of the a.e. convergence of inverse Fourier transforms on Euclidean spaces for square integrable 2) an extension to Lie groups. The first result is in collaboration with Colzani, and Meaney, the second one with Meaney and Mueller. (Received July 29, 2008)
