Francine F. Abeles* (fabeles@kean.edu), 1000 Morris Avenue, Union, NJ 07083. *The Early History of Quasideterminants in the Nineteenth Century*. Preliminary report.

Arthur Cayley, James Joseph Sylvester, and Charles L. Dodgson were the most important nineteenth century mathematicians whose work has influenced the modern development of quasideterminants. In this paper I will discuss those contributions and their significance. (Received May 27, 2008)
