Chris Rodger* (rodgec1@auburn.edu), 221 Parker Hall, Auburn University, AL 36849. *Cycle Systems - Some recent progress.*

In this talk, some results on cycle systems will be presented. The focus will be on 4-cycles, though the problems are ripe for generalization. In particular, cycle systems with 2 associate classes, and cycle systems of line graphs will be considered. (Received July 01, 2008)
