S H Holliday* (sarah.holliday@gmail.com), 5227 Ogilvie Ave, Paducah, KY. *Current work on variations of the Oberwolfach problem.*

The Oberwolfach problem is a collection of problems covering resolvable decompositions of complete graphs and complete multipartite graphs into cycles. In this talk, I'll present some history, some known results and some new results. (Received May 20, 2008)
