Sun Kim* (sunkim2@uiuc.edu), 1409 W. Green St, Urbana, IL 61801. *Bijjective proofs for some partition identities involving parity.*

Recently, G.E. Andrews posed open questions regarding parity in partition identities. Some of them are connected with partition identities of Rogers, Ramanujan and Gordon. In this talk, we give bijective proofs for some of them. (Received February 04, 2009)
