**Mahmoud Zeinalian\*** (mzein@mpim-bonn.mpg.de), **John Terilla** (jterilla@qc.cuny.edu)  
and **Thomas Tradler** (ttradler@citytech.cuny.edu). *Homotopy triviality of the circle action  
and the Hochschild complex*. Preliminary report.

I will discuss operadic meaning and some consequences of the homotopy triviality of the circle action given by Connes B operator on the Hochschild complex. This is joint work with John Terilla and Thomas Tradler. (Received January 22, 2009)
