Richard I Avery* (rich.avery@dsu.edu), Dakota State University, 820 North Washington Avenue, Madison, SD 57042, and **Johnny L Henderson** and **Douglas R Anderson**. *An Extension of the Leggett-Williams Fixed Point Theorem.*

An extension of the Leggett-Williams Fixed Point Theorem is presented which requires neither of the functional boundaries to be invariant with respect to the functional wedge. (Received June 23, 2009)
