Aaron Levin*, 307 Olden Ln, Princeton, NJ 08540, and **Julie Tzu-Yueh Wang** and **Ta Thi Hoai An**. *A p -adic Nevanlinna-Diophantine Correspondence*. Preliminary report.

In analogy with the now well-known correspondence between Nevanlinna theory and Diophantine approximation (Vojta's dictionary), we discuss a correspondence between, on the one hand, p -adic Nevanlinna theory and p -adic analytic maps, and on the other hand, certain Diophantine statements over the rational numbers and integers.
