**Semail ULGEN YILDIRIM\*** ([sulgen@math.northwestern.edu](mailto:sulgen@math.northwestern.edu)), Northwestern University  
2033 Sheridan Rd, Lunt Hall 223, Evanston, IL 60208. *Calculus Students: Learn from Others' Mistakes*. Preliminary report.

This project is about a new method which will facilitate Calculus learning. Indeed, it is very simple. Instructor prepares handouts where the questions are solved, however there are mistakes in the solutions. Students are required to find these mistakes and correct the mistakes if they could. The questions and solutions are taken from old midterms and finals where the real students made the real mistakes. We claim that this type of work will improve the success of a student a lot. We do not know how much. We will do the research on our students and present the results. (Received December 22, 2009)
