

**Meeting:** 999, Nashville, Tennessee, SS 1A, Special Session on Von Neumann Algebras and Noncommutative Ergodic Theory

999-37-98            **Florin Boca\***, Department of Mathematics, University of Illinois, 1409 W. Green Street, Urbana, IL 61801, and **Alexandru Zaharescu**. *On the distribution of some sequences related to Farey fractions.*

This talk will be concerned with some interesting new examples of limiting distributions which arise from the statistics of certain sequences related to Farey fractions. (Received August 15, 2004)
