July 2013

Dear Colleague:

At this time of membership renewal, I write to emphasize that the American Mathematical Society values your membership more than ever. Your society is involved in activities that are of vital importance to our profession. We foster mathematical research, encourage and support early career mathematicians, advance the reach and access of mathematical publications, and promote the role of mathematics in academia and society at large.

In 2014, the AMS will introduce a variety of new services to continue a commitment to reaching young mathematicians and responding to the realities of modern publishing. These features include the launch of AMS Graduate Student Chapters to bring mathematical events to campus, expanding the scope and breadth of our electronic publications through expanded titles and enhanced digital references, and introducing a secure members-only online mathematics collaboration forum.

As the AMS continues to look forward to our shared future, I encourage you to stay connected with over 30,000 individual members and 570 member institutions dedicated to promoting mathematical sciences worldwide. Thank you for your continued participation which supports your Society's service to the global mathematical sciences community.

Best Wishes,

A handwritten signature in black ink that reads "David A. Vogan Jr." in a cursive script.

David Vogan
President, AMS
