Algebra and Algebraic Geometry

Trends in Ring Theory

Vlastimil Dlab, Carleton University, Ottawa, ON, Canada, and László Márki, Hungarian Academy of Sciences, Budapest, Editors

The Ring Theory Conference (University of Miskolc, Hungary) successfully accomplished its two goals: 1) to reflect contemporary trends in the subject area and 2) to offer a meeting place for a large number of Eastern European algebraists and their colleagues from around the world.

Particular emphasis was placed on recent developments in the following four areas: representation theory, group algebras, PI algebras, and general ring theory. This book presents 13 of the invited lectures.

Members of the Canadian Mathematical Society may order at the AMS member price.

Deformations of Galois Representations and Hecke Algebras

J. Tilouine, Université de Paris Nord, Villetaneuse, France

This book presents an expanded version of a course delivered at Hokkaido University (Sapporo, Japan) and at the Mehta Research Institute (Allahabad, India). Its aim is to examine aspects of the relationship connecting the local moduli space of deformations of a mod p "modular" Galois representation to the corresponding local component of a p -adic Hecke algebra.
