# Meetings & Conferences of the AMS

**PROGRAM ALERT:** In order that AMS meeting programs include the most timely information for each speaker, abstract deadlines have been moved to dates much closer to the meeting. What this means is that most meeting programs will appear in the *Notices* *after* the meeting takes place. However, complete meeting programs will be available on e-MATH about two to three weeks after the abstract deadline. **\*Remember\***, e-MATH is your most comprehensive source for up-to-date meeting information. See <http://www.ams.org/meetings/>.

A serendipitous development of theoretical physics in the past decade was the apparent confluence of some major issues in several areas of physics: quantum measurement, quantum cosmology and semiclassical gravity, quantum chaos and mesoscopic physics.

Although these areas address vastly different aspects of physics, covering atomic, molecular and quantum optics, condensed matter, nuclear physics, particle physics and general relativity, they all share the common concern of how the many quantum and classical features of matter and spacetime and their dynamics are related to each other. This fundamental issue—which lies at the base of all aspects of physics—was the theme of this conference, The Fourth Drexel Symposium on Quantum Nonintegrability.

The series of three conferences held at Drexel University (Philadelphia, PA) was designed to be a forum on quantum chaos and related topics. This book offers a broad perspective on the topic by encompassing the above-mentioned areas into one unifying conference theme: quantum-classical correspondence. The articles included in this volume help to bring into focus the basic issues these areas share.
