

Journal of Hyperbolic Differential Equations

<http://www.worldscinet.com/jhde>

Editors

Philippe G. LeFloch
(CNRS & University of Paris VI)

Jian-Guo Liu
(University of Maryland)

Aims & Scope

The *Journal of Hyperbolic Differential Equations* publishes original articles on nonlinear hyperbolic conservation laws, nonlinear wave equations, and other dispersive partial differential equations. Such equations arise in mathematical physics and continuum physics and include, for instance, the Einstein equations of general relativity, Dirac equations, relativistic and nonrelativistic Euler models of compressible fluids, mixed models of transonic flows, etc.

Recently Published Papers

HYPERBOLIC SYSTEMS OF BALANCE LAWS WITH WEAK DISSIPATION

C.M. Dafermos (Brown University, USA)

COSMOLOGICAL SINGULARITIES, EINSTEIN BILLIARDS AND LORENTZIAN KAC-MOODY ALGEBRAS

T. Damour (Institut des Hautes Études Scientifiques, France)

THE ELLIPTICITY PRINCIPLE FOR SELF-SIMILAR POTENTIAL FLOWS

V. Elling (Brown University, USA)
Tai-Ping Liu (Stanford University, USA)

A KIRCHOFF-SOBOLEV PARAMETRIX FOR THE WAVE EQUATION AND APPLICATIONS

S. Klainerman and **I. Rodnianski** (Princeton University, USA)

ON ONE BLOW UP POINT SOLUTIONS TO THE CRITICAL NONLINEAR SCHRÖDINGER EQUATION

F. Merle (Institut des Hautes Etudes Scientifiques and Université de Cergy-Pontoise, France)
P. Raphael (Université de Paris-Sud, France)

A DECAY THEOREM FOR SOME SYMMETRIC HYPERBOLIC SYSTEMS

C.S. Morawetz and **B. Thomases** (New York University, USA)

CURVATURE BLOW UP ON A DENSE SUBSET OF THE SINGULARITY IN T₃-GOWDY

H. Ringström (KTH Stockholm, Sweden)

GLOBAL REGULARITY FOR A LOGARITHMICALLY SUPERCRITICAL DEFOCUSING NONLINEAR WAVE EQUATION FOR SPHERICALLY SYMMETRIC DATA

T. Tao (University of California, Los Angeles, USA)
