

▶ *Now in its 41st year*

Journal of Differential Geometry
Publishing the latest research in differential geometry and related areas of differential equations, mathematical physics, algebraic geometry, and geometric topology.

▶ *Just Introduced*

Communications in Number Theory and Physics
Following significant interactions between number theory, arithmetic geometry and theoretical physics—particularly in string theory.

Pure Mathematics

Asian Journal of Mathematics
Original research in all areas of pure mathematics and applied theoretical mathematics. 4 issues/year.

Mathematical Research Letters
Rapid publication of short complete papers of original research in all areas of mathematics. 6 issues/year.

Pure and Applied Mathematics Quarterly
High-quality papers in all fields of mathematics; promoting ideas and exchange between the specialties. Based in China. 4 issues/year.

All 3 for \$860

*Coming in
2008*

Statistics and its Interface
Emphasizing substantive problems, sound statistical models and methods, clear and efficient computational algorithms, and insightful discussions of the motivating problems. 2 issues/2008. Included in the Applied Mathematics Package.

Applied Mathematics

Communications in Information and Systems
The latest in information and coding theory, control theory, signal and image processing, and communication theory. 4 issues/year.

Communications in Mathematical Sciences
Modern applied mathematics in modeling, applied and stochastic analyses; physical, biological, engineering, and financial applications. 4 issues/year.

Dynamics of Partial Differential Equations
Following trends in partial differential equations and dynamical systems. 4 issues/year.

Methods and Applications of Analysis
Selected papers in pure and applied analysis; with applications to natural sciences and engineering. 4 issues/year.

Journal of Combinatorics
Following diverse branches of discrete mathematics, including combinatorics, graph theory, discrete algorithms. 4 issues/year.

Statistics and its Interface
As described. 2 issues/2008.

All 6 for \$1,060

Geometry/Topology

Advances in Theoretical and Mathematical Physics
Exploring the diverse areas where theoretical physics and mathematics interact. 6 issues/year.

Communications in Analysis and Geometry
High-quality papers on classical analysis, partial differential equations, algebraic geometry, differential geometry, and topology. 5 issues/year.

Communications in Number Theory and Physics
Described above. 4 issues/year.

Homology, Homotopy and Applications
One of the few journals in the world that publishes primarily on homology and homotopy as they relate to algebra, algebraic topology, and other areas of mathematics. 2 issues/year.

Journal of Differential Geometry
Described above. 9 issues/year.

Journal of Symplectic Geometry
Following the impact of symplectic geometry upon mathematics. 4 issues/year.

All 6 for \$1,560

▶ *The Full Package:
15 journals for \$3,410*
