

Do you know
someone who
loves π as
much as pie?

Would they also love a full-tuition scholarship for a master's degree in mathematics education, a New York State Teaching Certificate, and a **\$90,000** stipend in addition to a competitive salary as a New York City secondary school math teacher? Math for America offers fellowships with these benefits and more to individuals who know and love math, enjoy working with young people, have excellent communications skills, and a strong interest in teaching. Log on to learn more.

MfA $4 \sum_{k=1}^{\infty} \frac{(-1)^{k-1}}{2k-1}$
