## **Unique Investigation of Primes Based upon Symmetric Sequences of Integers and their Transforms**

This investigation unearthed interesting new finds and insights, which are now available at [www.primestructure.com](http://www.primestructure.com). These include:

- a method to superimpose structure upon the sieve of Eratosthenes
- 2 recursive prime formulae expressing this method algebraically
- infinitely many structures useful in modeling prime numbers
- a general construct that encompasses these structures
- singular properties of 2 types of symmetric sequences of integers
- structures that provide insights into prime numbers even though they appear independent of primes
- original derivations of 14 properties of primes using the above

For example, the infinitude of primes derives directly from the structured sieve method and its algebraic expression:

With  $S_0 \equiv [1 \ 1]$ , by construction the  $2^{\text{nd}}$  term in each of the recursively generated integer sequence  $S_k$ ,  $k = 1, 2, 3 \dots$ , is a distinct prime.

For an overview, or full details, see [www.primestructure.com](http://www.primestructure.com).

## **Assistant Professor in Mathematics**

ETH Zurich is looking for qualified candidates from all areas of mathematics. Duties of this position include, in addition to research, an active participation in the teaching of mathematics courses for students of mathematics, natural sciences, and engineering.

Candidates should have a doctorate or equivalent and have demonstrated the ability to carry out independent research. Willingness to teach at all university levels and to collaborate with colleagues is expected. Courses at Master level may be taught in English.

This assistant professorship has been established to promote the careers of younger scientists. Initial appointment is for four years, with the possibility of renewal for an additional two-year period.

Please submit your application together with a curriculum vitae and a list of publications to **the President of ETH Zurich, ETH Zurich, Raemistrasse 101, CH-8092 Zurich, Switzerland, no later than February 29, 2008**. With a view toward increasing the number of female professors, ETH Zurich specifically encourages qualified female candidates to apply.
