

Authors:

Let the **AMS Author Resource Center** be your *all-in-one* guide for writing and publishing mathematics

The Center includes:

- Tools for writing mathematics, including LaTeX and TeX resources and graphics guidelines
- Mathematical Reviews tools to create references and provide linking capabilities
- Resources for AMS Book Authors (learn how to prepare a proposal and how to produce and submit your manuscript)
- Specific resources for AMS Journal Authors (find information about each journal, explore the Author Handbook, and obtain details about copyright, permissions, manuscript tracking, and more)
- AMS Acquisitions Editors contact information
- Answers to Frequently Asked Questions from AMS authors and access to technical support

General Author Resources

The American Mathematical Society is committed to furthering the interests of mathematical research and scholarship for the global mathematics community. Towards this goal, we invite all mathematicians to use the tools provided on the Author Resource Center to prepare their work for publication.

Tools for writing mathematics

Many mathematics publishers (including the AMS) strongly encourage the use of LaTeX

Learn why mathematics publishers support the use of LaTeX

Reference books available from the AMS

Download AMS LaTeX Version 2

Graphics guidelines

Author Packages

Journal author packages

Monograph author packages

Collections and proceedings volumes author packages

Mathematical Reviews tools

Discover the benefits of using MR tools to create references and provide linking capabilities

MSC - Mathematics Subject Classification numbers

MRef - create standard references with links to MathSciNet

MR Lookup - verify references and add links to MathSciNet

MR serials abbreviations - reference form used in Mathematical Reviews (MR)

Each author package page has a simple three-step process to download zip files containing templates, sample files, style files, guidelines, and instruction manuals.
