enthusiastic students at the Oregon Museum of Science and Industry (OMSI) in late October. Arnold Ross (1906–2002) started a mathematics enrichment program for high school teachers in 1947. He started his multi-level summer program for gifted high school students in 1957 and ran it every summer until 2000, giving the number theory lecture each morning. In keeping with this prestigious tradition, the AMS presents a lecture for talented high school mathematics students each year to stimulate their interest in mathematics beyond the traditional classroom and to show them the tremendous opportunities for careers in mathematics—as mathematics teachers and as researchers in government, industry, and university programs. The 2009 lecture will be held at the National Science Center in Augusta, Georgia. Read about the 2008 lecture and *Who Wants to Be a Mathematician* that immediately followed at <http://www.ams.org/wwtbam/archive/ar12008.html>.

• **Feature Column.** Recent columns include “From Bézier to Bernstein”, by Bill Casselman, “Inside-out Frieze Symmetries in Ancient Peruvian Weavings”, by Tony Phillips, “Gray Codes”, by Joe Malkevitch, and “Percolation: Slipping through the Cracks”, by David Austin, at <http://www.ams.org/featurecolumn/>.

• **Mathematicians in the media** over the past few months include **Jason Brown** (Dalhousie University) for work he did analyzing the opening chord of “A Hard Day’s

Night”; **Donald Saari** (University of California, Irvine) and **John Allen Paulos** (Temple University), explaining aspects of mathematics and voting; **Oded Schramm**, a member of the Theory Group at Microsoft Research, who died in a tragic hiking accident; **Donald Clayton Spencer**, who had a mountain peak in Colorado named after him; and **Manil Suri** (University of Maryland Baltimore County), who also writes novels. Find these and other mathematicians quoted in newspapers and interviewed on radio in the 2008 Math Digest archive at <http://www.ams.org/mathmedia/mathdigest/md-2008-toc.html>.
