## Elementary Calculus of Financial Mathematics

A. J. Roberts

This book introduces the fascinating area of financial mathematics and its calculus in an accessible manner geared toward undergraduate students. Among the topics covered are the binomial lattice model for evaluating financial options, the Black–Scholes and Fokker–Planck equations, and the interpretation of Ito’s formula in financial applications.

2008 · xii + 128 pages · Softcover  
ISBN 978-0-898716-67-2 · List Price \$59.00  
SIAM Member Price \$41.30 · Code MM15

## Introduction to Interval Analysis

Ramon E. Moore, R. Baker Kearfott, and Michael J. Cloud

This unique book provides an introduction to a subject whose use has steadily increased over the past 40 years. An update of Ramon Moore’s previous books on the topic, it provides broad coverage of the subject as well as the historical perspective of one of the originators of modern interval analysis.

2009 · xii + 223 pages · Softcover  
ISBN 978-0-898716-69-6 · List Price \$72.00  
SIAM Member Price \$50.40 · Code OT110

## Generalized Inverses of Linear Transformations

Stephen L. Campbell and Carl D. Meyer

This book is an excellent reference for researchers and students who need or want more than just the most basic elements. First published in 1979, the book remains up-to-date and readable; it includes chapters on Markov Chains and the Drazin inverse methods that have become significant to many problems in applied mathematics.

2008 · xx + 272 pages · Softcover  
ISBN 978-0-898716-71-9 · List Price \$68.00  
SIAM Member Price \$47.60 · Code CL56

## Introduction to Derivative-Free Optimization

Andrew R. Conn, Katya Scheinberg, and Luis N. Vicente

The absence of derivatives, often combined with the presence of noise or lack of smoothness, is a major challenge for optimization. This book explains how sampling and model techniques are used in derivative-free methods and how these methods are designed to efficiently and rigorously solve optimization problems.

2009 · xii + 277 pages · Softcover  
ISBN 978-0-898716-68-9 · List Price \$73.00  
SIAM Member Price \$51.10 · Code MP08

## UAV Cooperative Decision and Control: Challenges and Practical Approaches

Edited by Tal Shima and Steven J. Rasmussen

This book provides an authoritative reference on cooperative decision and control of Unmanned aerial vehicles (UAVs) and the means available to solve problems involving them.

2008 · xxii + 164 pages · Hardcover  
ISBN 978-0-898716-64-1 · List Price \$85.00  
SIAM Member Price \$59.50 · Code DC18

## Feedback Systems: Input-Output Properties

Charles A. Desoer and M. Vidyasagar

This book was the first and remains the only book to give a comprehensive treatment of the behavior of linear or nonlinear systems when they are connected in a closed-loop fashion, with the output of one system forming the input of the other.

2008 · xx + 264 pages · Softcover  
ISBN 978-0-898716-70-2 · List Price \$65.00  
SIAM Member Price \$45.50 · Code CL55
