## The Basics of Practical Optimization

Adam B. Levy

This textbook provides undergraduate students with an introduction to optimization and its uses for relevant and realistic problems. It presents step-by-step solutions for five prototypical examples that fit the general optimization model, along with instruction on using numerical methods to solve models and making informed use of the results.

## Learning MATLAB

Tobin A. Driscoll

This engaging book is a concise introduction to the essentials of the MATLAB® programming language and is ideal for readers seeking a focused and brief approach to the software.

*Learning MATLAB* contains numerous examples and exercises involving the software's most useful and sophisticated features and an overview of the most common scientific computing tasks for which it can be used.

## Numerical Matrix Analysis: Linear Systems and Least Squares

Ilse C. F. Ipsen

This self-contained textbook presents matrix analysis in the context of numerical computation with numerical conditioning of problems and numerical stability of algorithms at the forefront. The material is presented at a basic level, emphasizing ideas and intuition, and each chapter offers simple exercises for use in the classroom and more challenging exercises for student practice.

## FAIR: Flexible Algorithms for Image Registration

Jan Modersitzki

Written from an interdisciplinary point of view, this book will appeal to mathematicians who want to learn more about image registration, medical imaging professionals who want to know more about and explore available imaging techniques, and computer scientists and engineers who want to understand the numerical schemes behind the techniques.

## Fundamentals of Radar Imaging

Margaret Cheney and Brett Borden

The goal of this book is to provide mathematicians with the background they need to work in the field of radar imaging, building on the foundation of the underlying partial differential equations. The focus is on showing the connection between the physics and the mathematics and on supplying an intuitive mathematical understanding of basic concepts.

## Lectures on Stochastic Programming: Modeling and Theory

Alexander Shapiro, Darinka Dentcheva, and Andrzej Ruszczyński

This book focuses on optimization problems involving uncertain parameters and covers the theoretical foundations and recent advances in areas where stochastic models are available.
