

## NEW AT DE GRUYTER

Alexander Kheyfits

### A PRIMER IN COMBINATORICS

Approx. 350 pages.

**Paperback.** RRP € [D] 39.95 / \*US\$ 62.00. ISBN 978-3-11-022673-7

**eBook.** Price upon Request. ISBN 978-3-11-022674-4

(de Gruyter Textbook)

to be published May 2010

- For a one- or two-semester undergraduate or an entry-level graduate course
- Also suitable for self-study
- Over 700 problems, some of them with answers or tips

V.G. Turaev

### QUANTUM INVARIANTS OF KNOTS AND 3-MANIFOLDS

2nd rev. ed. Approx. 600 pages.

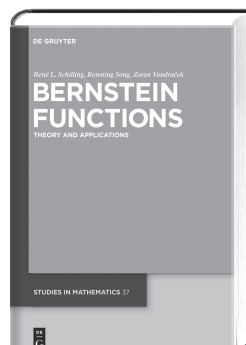

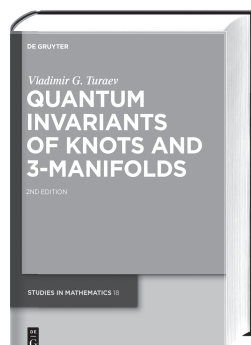

**Hardcover.** RRP € [D] 119.95 / \* US\$ 186.00. ISBN 978-3-11-022183-1

**eBook.** RRP € 119.95 / \*US\$ 186.00. ISBN 978-3-11-022184-8

(de Gruyter Studies in Mathematics 18)

to be published April 2010

This monograph, now in its second revised edition, provides a systematic treatment of topological quantum field theories (TQFT's) in three dimensions, inspired by the discovery of the Jones polynomial of knots, the Witten-Chern-Simons field theory, and the theory of quantum groups. The author, one of the leading experts in the subject, gives a rigorous and self-contained exposition of new fundamental algebraic and topological concepts that emerged in this theory.

Rene Schilling / Renming Song / Zoran Vondracek

### BERNSTEIN FUNCTIONS

Theory and Applications

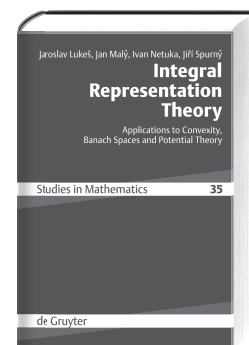

2010. xii, 313 pages.

**Hardcover.** RRP € [D] 79.95 / \*US\$ 124.00. ISBN 978-3-11-021530-4

**eBook.** RRP € 89.00 / \*US\$ 124.00. ISBN 978-3-11-021531-1

(de Gruyter Studies in Mathematics 37)

- A self-contained and unified approach to the topic
- With applications to various fields of mathematics, such as probability theory, potential theory, operator theory, integral equations, functional calculi and complex analysis
- With an extensive list of complete Bernstein functions.

### INTEGRAL REPRESENTATION THEORY

Applications to Convexity, Banach Spaces and Potential Theory

By Jaroslav Lukeš / Jan Malý / Ivan Netuka / Jiří Spurný

2010. xvi, 715 pages.

**Hardcover.** RRP € [D] 99.95 / \*US\$ 129.95. ISBN 978-3-11-020320-2

**eBook.** RRP € 111.00 / \*US\$ 129.95. ISBN 978-3-11-020321-9

(de Gruyter Studies in Mathematics 35)

From the contents:

- Geometry of convex sets
- Choquet theory of function spaces
- Affine functions on compact convex sets
- Perfect classes of functions and representation of affine functions
- Simplicial function spaces
- Choquet's theory of function cones
- Topologies on boundaries
- Several results on function spaces and compact convex sets
- Continuous and measurable selectors
- Construction of function spaces
- Function spaces in potential theory and Dirichlet problem
- Applications
