### THEORETICAL FOUNDATIONS AND NUMERICAL METHODS FOR SPARSE RECOVERY

Ed. by Massimo Fornasier

07/2010. x, 340 pages.

**Hardcover** RRP € [D] 139.95 /\*US\$ 196.00. ISBN 978-3-11-022614-0

Also available as an **eBook**: RRP € 139.95 /\*US\$ 196.00

ISBN 978-3-11-022617-7

Radon Series on Computational and Applied Mathematics 9

The present collection of four lecture notes is the very first contribution of this type in the field of sparse recovery. This unique collection will be of value for a broad community and may serve as a textbook for graduate courses.

### NEW EDITION

W. Hugh Woodin

### THE AXIOM OF DETERMINACY, FORCING AXIOMS, AND THE NONSTATIONARY IDEAL

2nd ed. 07/2010. vi, 852 pages.

**Hardcover** RRP € [D] 149.95 /\*US\$ 169.95. ISBN 978-3-11-019702-0

Also available as an **eBook**: RRP € 149.95 /\*US\$ 169.95

ISBN 978-3-11-021317-1

de Gruyter Series in Logic and Its Applications

This monograph is directed to researchers and advanced graduate students in Set Theory. The second edition is updated to take into account some of the developments in the decade since the first edition appeared, this includes a revised discussion of  $\Omega$ -logic and related matters.

Mohamed Asaad/Adolfo Ballester-Bolinches/  
Ramon Esteban-Romero

### PRODUCTS OF FINITE GROUPS

to be published October 2010. 320 pages.

**Hardcover** RRP € [D] 109.95 /\*US\$ 154.00. ISBN 978-3-11-020417-9

Also available as an **eBook**: RRP € 109.95 /\*US\$ 154.00

ISBN 978-3-11-022061-2

de Gruyter Expositions in Mathematics 53

The study of finite groups factorised as a product of two or more subgroups has become a subject of great interest during the last years with applications not only in group theory, but also in other areas like cryptography and coding theory. The aim of this book is to gather, order, and examine part of this material, including the latest advances made, give some new approach to some topics, and present some new subjects of research in the theory of finite factorised groups.

### CASIMIR FORCE, CASIMIR OPERATORS AND THE RIEMANN HYPOTHESIS

Mathematics for Innovation in Industry and Science

Ed. by Gerrit van Dijk/Masato Wakayama

to be published October 2010. Approx. 290 pages.

**Hardcover** RRP Euro [D] 139.95 /\* US\$ 196.00. ISBN 978-3-11-022612-6

Also available as an **eBook**: RRP € 139.95 /\*US\$ 196.00

ISBN 978-3-11-022613-3

de Gruyter Proceedings in Mathematics

This volume contains the proceedings of the conference "Casimir Force, Casimir Operators and the Riemann Hypothesis – Mathematics for Innovation in Industry and Science" held in November 2009 in Fukuoka (Japan). The motive for the conference was the celebration of the 100th birthday of Casimir and the 150th birthday of the Riemann hypothesis.

\*for orders placed in North America. Prices are subject to change. Prices do not include postage and handling. eBooks currently only available for libraries/institutions.
