# DE GRUYTER STUDIES IN MATHEMATICS

Hans-Otto Georgii

GIBBS MEASURES AND PHASE TRANSITIONS

2nd ext. ed. 2011. xiv, 542 pages. RRP € 119.95 [D]/*US$ 180.00
**Hardcover** ISBN 978-3-11-025029-9
eBook ISBN 978-3-11-025032-9
(De Gruyter Studies in Mathematics 9)

▸ Covers in depth a broad range of topics in the mathematical theory of phase transition in statistical mechanics
▸ Informs about the state of the art in several directions
▸ Accessible to a general readership of mathematicians with a basic knowledge of measure theory and probability
▸ Does not assume any prior knowledge of statistical mechanics

„This book is much more than an introduction to the subject of its title. It covers in depth a broad range of topics in the mathematical theory of phase transition in statistical mechanics and as an up to date reference in its chosen topics it is a work of outstanding scholarship. It is in fact one of the author's stated aims that this comprehensive monograph should serve both as an introductory text and as a reference for the expert."
Fredos Papangelou, Zentralblatt MATH

József Lörinczi, Fumio Hiroshima, Volker Betz

FEYNMAN-KAC-TYPE THEOREMS AND GIBBS MEASURES ON PATH SPACE

With Applications to Rigorous Quantum Field Theory

08/2011. Approx. x, 520 pages. RRP € 88.00 [D]/*132.00
Hardcover ISBN 978-3-11-020148-2
eBook ISBN 978-3-11-020373-8
(De Gruyter Studies in Mathematics 34)

This monograph offers a state-of-the-art mathematical account of functional integration methods in the context of self-adjoint operators and semigroups using the concepts and tools of modern stochastic analysis. These ideas are then applied principally to a rigorous treatment of some fundamental models of quantum field theory. In this self-contained presentation of the material both beginners and experts are addressed, while putting emphasis on the interdisciplinary character of the subject.

Nikolai A. Perestyuk, Viktor A. Plotnikov, Anatolii M. Samoilenko, Nataliya V. Skripnik

DIFFERENTIAL EQUATIONS WITH IMPULSE EFFECTS

Multivalued Right-hand Sides with Discontinuities

07/2011. xiv, 307 pages. RRP € 99.95 [D]/*US$ 150.00.
Hardcover ISBN 978-3-11-021816-9
eBook ISBN 978-3-11-021817-6
(De Gruyter Studies in Mathematics 40)

This monograph is devoted to the investigation of impulsive differential equations with set-valued and discontinuous right-hand sides. It is intended for researchers, lecturers, postgraduate students, and students of higher schools specialized in the field of the theory of differential equations, the theory of optimal control, and their applications.
