

## Undiluted Hocus-Pocus

The Autobiography of Martin Gardner  
*Martin Gardner*

With a foreword by *Persi Diaconis*  
and an afterword by *James Randi*

“Informative, original, unexpected, and always charmingly written with his uniquely subtle sense of fun, this final autobiographical work of Martin Gardner sums up his own life and opinions, in the way that has become so familiar and inspirational to us from his well-known writings on puzzles, mathematics, philosophy, and the oddities of the world.”

—Roger Penrose, author of *Cycles of Time*

Cloth \$24.95 978-0-691-15991-1

## The Universe in Zero Words

The Story of Mathematics as Told through Equations

*Dana Mackenzie*

“Extremely entertaining and stimulating. . . . [Mackenzie’s] *Universe in Zero Words* will seduce any scientist, but also anyone with some curiosity and desire to get more familiar with the history of human thinking and knowledge.”

—Jean-Baptiste Gramain,  
*LMS Newsletter*

Paper \$19.95 978-0-691-16016-0

## Will You Be Alive 10 Years from Now?

And Numerous Other Curious Questions in Probability

*Paul J. Nahin*

“Readers of this absorbing book will gain significant pleasure as well as a broadened understanding of the nuances of mathematics, along with a wonderful picture of how analytics and simulations complement each other. Nahin is a master at this. I love this book!”

—Joseph Mazur, author of *What’s Luck Got to Do with It?*

Cloth \$27.95 978-0-691-15680-4

## Four Colors Suffice

How the Map Problem Was Solved, Revised Color Edition

*Robin Wilson*

With a new foreword by *Ian Stewart*

“Wilson appeals to the mathematical novice with an unassuming lucidity. It’s thrilling to see great mathematicians fall for seductively simple proofs, then stumble on equally simple counterexamples. Or swallow their pride.”

—Jascha Hoffman, *Boston Globe*

Princeton Science Library

Paper \$24.95 978-0-691-15822-8

## Degenerate Diffusion Operators Arising in Population Biology

*Charles L. Epstein & Rafe Mazzeo*

This book provides the mathematical foundations for the analysis of a class of degenerate elliptic operators defined on manifolds with corners, which arise in a variety of applications such as population genetics, mathematical finance, and economics. The results discussed in this book prove the uniqueness of the solution to the Martingale problem and therefore the existence of the associated Markov process.

## Spaces of PL Manifolds and Categories of Simple Maps

*Friedhelm Waldhausen,  
Bjørn Jähren & John Rognes*

Since its introduction by Friedhelm Waldhausen in the 1970s, the algebraic K-theory of spaces has been recognized as the main tool for studying parametrized phenomena in the theory of manifolds. However, a full proof of the equivalence relating the two areas has not appeared until now. This book presents such a proof, essentially completing Waldhausen’s program from more than thirty years ago.
