

Teacher's Pet

WebAssign makes the highest grade every time.

Whiz Kid? Teacher's Pet? Whatever you call us, when it comes to math WebAssign goes to the head of the class. Even the toughest open-ended calculus problems can't stump WebAssign. Our patent-pending grading engine recognizes all algebraically equivalent answers to even the most complex problems. In other words, WebAssign grades like a real professor. It's all part of the WebAssign commitment to excellence in education. And, we'll admit it, we really like being at the head of the class.

WebAssign. Smart teaching. Inspired learning.

Visit webassign.com/grading-engine to learn how the WebAssign Answer Evaluation and Grading System works.
