Banach Journal of Mathematical Analysis

Mohammad Sal Moslehian, editor in chief

Four issues annually

projecteuclid.org/bjma

The *Annals of Functional Analysis* (*AFA*) and the *Banach Journal of Mathematical Analysis* (*BJMA*) are peer-reviewed electronic journals publishing high-quality papers on matrix analysis (MSC15), abstract harmonic analysis (MSC43), functional analysis (MSC46), operator theory (MSC47), and all modern related topics.

AFA publishes original short papers that present new and deep results with interesting implications. *BJMA* is composed of survey articles and original-research long papers that provide major results, have profound impact, and carry significant implications in the development of new ideas.

Both journals are published on behalf of the Tusi Mathematical Research Group. These online-only publications are available to libraries as part of the Euclid Prime collection of mathematics and statistics journals.

All Duke University Press mathematics journals are available online at projecteuclid.org.

PROJECT EUCLID

mathematics and statistics online

Project Euclid is your source for online scholarship in mathematics and statistics. This powerful, not-for-profit platform hosts journals, books, and proceedings and is designed to meet the specific needs of these fields.

Project Euclid is actively seeking partnerships with high-quality independent and society publishers of mathematics and statistics titles. Please e-mail Mira Waller at mira.waller@projecteuclid.org.

Platform features include

- full-text searches and enhanced PDFs
- early access to some forthcoming articles
- the MathJax display engine for clearly rendered formulas and symbols
- links from each article to MathSciNet (Math Reviews), Zentralblatt MATH, and CrossRef
- highly reliable access (less than two hours of site downtime over the past twelve months)
- responsive design optimized for mobile devices
