Each month, the Feature Column provides an online in-depth look at a mathematical topic. Complete with graphics, links, and references, the columns cover a wide spectrum of mathematics and its applications, often including historical figures and their contributions. The authors—David Austin, Bill Casselman, Joe Malkevitch, and Tony Phillips—share their excitement about developments in mathematics.

Recent essays include:

- Why Do We Expect Lots of Twin Primes?
- The Topology of Impossible Spaces
- Mathematics and Chemistry: Partners in Understanding Our World
- Congressional Redistricting and Gerrymandering
- Feeling Your Way Around in High Dimensions
- The Knots in the Quipu, and in the Friar's Belt
- Magical Mathematics - A Tribute to Martin Gardner
- How to Make a 3D Print
